STATE BANKS.

LETTER

FROM

THE SECRETARY OF THE TREASURY,

TRANSMITTING

Statements showing the condition of certain State banks, &c. &c., reudered in compliance with a resolution of the House of Representatives, of 10th July, 1832.

JANUARY. 4, 1837.

Read, and laid upon the table.

TREASURY DEPARTMENT, January 3, 1836.

Sire: I have the honor to submit the following report, in compliance with the resolution of the House of Representatives, dated July 10, 1832, directing the Secretary of the Treasury "to lay before this House, at the next and each successive session of Congress, copies of such statements and returns, showing the capital, circulation, discounts, specie, deposites, and condition of the different State banks and banking companies as may have been communicated to the Legislatures, Governors, or other officers of the several States within the year, and made public; and where such statements cannot be obtained, such other authentic information as will best supply the deficiency."

To enable me to comply with this resolution, a correspondence was instituted during the last year, more extensive than in former years, with the officers of the State Governments, and, where this failed to elicit the desired information, with the officers of the State banks. The general result

is exhibited in the tables and documents hereunto appended.

The tables and documents from A to Z, inclusive, exhibit the condition of the banks in each State and Territory. In those cases in which the returns have not been arranged in tabular form by the State authorities, it has been done in this department, and such incidental information as the reports contained has been thrown into the form of notes.

Table A A is a summary statement of the condition of all the banks in the United States at the dates annexed, and as near the 1st of January,

1836, as returns could be obtained.

B B is a list of the banks whose capitals have been increased since the date of the returns given in the tables and documents from A to Z, inclusive.

C C is a list of the banks lately chartered.

Blair & Rives, printers.

D D gives the ratio of circulation to specie of the banks in the different

States and Territories in 1834-35, and 1835-36.

E E is a table showing the increase or decrease of specie in the bank of the different States, as ascertained by comparing the amounts given it the present report with the amounts given in the Treasury report of January 5th, 1836.

F F is a "comparative view of the condition of all the banks in the

United States in 1833-34, 1834-35, and 1835-36."

G G gives the number and capital of all the banks in the different States and Territories at twelve distinct intervals, from 1792 to Decembe 1836.

H H and I I are lists of all the banks established in the United State from 1781-82 to 1811.

J J is a condensed statement of the condition, at eight different interval of all the banks in the United States.

I have the honor to remain, very respectfully, Your obedient servant,

LEVI WOODBURY, Secretary of the Treasury.

The Hon. the Speaker of the House of Representatives.

STATEMENTS

SHOWING THE

CAPITAL, CIRCULATION, DISCOUNTS, SPECIE, &c.

OF THE DIFFERENT

STATE BANKS AND BANKING COMPANIES

IN THE

UNITED STATES.

Doc. No. 65.

AN-AESTEACT from the returns of the directors of the several incorporated banks within this State, made to the office of the Secretary of State, as they existed on the Saturday preceding the first Monday of Inne, 1836; printed agreeably to the second section of an act entitled "An act additional to an act to regulate banks and banking," passed March 4, 1833; also, an appendix, showing the place of location of each, when incorporated, and when rechartered.

A-STATE OF MAINE.

ASAPH R. NICHOLS, Secretary of State.

Notes.—The above table has been prepared from materials furnished to the department by the late inspector of the banks in Vermont, with the exception of the statement of the affairs of the Essex Bank, which has been taken from the Treasury report of January 5, 1836.

Another table, obtained from the assistant Secretary of the Senate of Vermont, differs from the above in the statement it gives of the accounts of some of the banks, but the differences are not so great as to deserve to

be specially noted.

The bank inspector says, in a note, "The Essex Bank was incorporated in 1833, with a capital of 40,000 dollars. The bank went into operation with a pretended capital of 20,000 dollars, and has been reported as possessed of 20,000 dollars. From an inspection of the papers of the bank, it appears that the present president, J. D., obtained a loan of more than 18,000 dollars of the Haverhill (N. H.) Bank; deposited the money in the Haverhill Bank, and took a certificate of deposite, which was used by the commissioners. The same day the directors were appointed, J. D., the president, and his father-in-law, T. C., borrowed or took the certificate of deposite and the remainder of the cash, returned the same to Haverhill, and took up the notes. That bank has no capital except the notes of the stockholders for 2,000 dollars, so I have refused to report it. It has a large amount of notes in circulation."

The statement of the affairs of the Essex Bank, given in the above table,

is taken from a report to the Legislature in October, 1834.

In a tabular statement of the banks of Vermont, which has appeared in the public prints, were the following items, viz: funds on interest, \$753,738; specie, bills of other banks, and deposites, \$1,027,821. A copy of this tabular statement was forwarded to the Treasury Department; and, in answer to a letter asking for some explanation, the bank inspector made the fol-

lowing reply:

"The table you received from the Treasurer of this State, a copy of which I forwarded, was prepared for the purpose of showing the profits of the banks from the capital paid in. The tabular line of deposites (in that table) shows the means of the banks, and not their liabilities. said due depositors for those sums deposited in our banks. The banks here have made use of the word deposites, for funds deposited in Boston and New York for the redemption of their bills at those places. The line of deposites [funds] on interest shows the amount of funds owned by the banks, or balances in the hands of their agents, to redeem their bills; and those funds consist of the notes of other banks and drafts, for which the banks receive from three to five per cent. interest. Specie, bills of other banks, and deposites in Boston, New York, &c., were formerly reported together, and the statements were made by the cashiers of the banks. personal examination of the books of the banks, I found that notes payable at the places of deposite, when not due, were called and reported as specie funds. I found, also, that of the capital or available means for the redemption of the bank issues, in 1834, at the time of the panic, more than \$700,000 were deposited in the hands of the brokers. The inducement to emplo brokers is, they receive from them greater interest than the banks [in New York and Boston will pay. This practice of redeening or exchanging bank notes in the cities, has, in some sections of our State, operated oppressively, and is, no doubt, one great cause of the pocuniary distress in the country; for, some banks have made the payment of notes in the

cities a condition of their discount. In such cases, funds are transmitted to the places of deposite, at the expense of the borrower. The tabular statement, before forwarded, was made in reference to that practice, and explained in the report I made to the Legislature, which they have not published. There has been strong objection made by some of the banks to my departing from the former practice. Perfect reliance cannot be placed upon the statement of the amount of funds deposited in the cities as the true sum. Some banks frequently overdraw, or do not provide funds for the redemption of their bills. Loans are obtained in the names of individuals, and the sum borrowed reported as funds of the banks. I know of one instance of a safety-fund bank depositing the notes of the bank as security for the loan. That was the Essex Bank, which is not included in the number here reported.

"I find, this year, but a small proportion of the funds deposited in Boston

and New York are in the hands of the brokers.

" November 24, 1836."

In addition to the banks, the names of which are given in the foregoing table, the Legislature of Vermont, in November, 1836, incorporated the Rail-road Bank, at Rutland, with a capital of \$300,000.

C No. 2-BANKS OF VERMONT-Continued.

TABLE II.

LIST of the banks in Vermont, with the date of their respective charters, and the amount of their authorized capital, from a table obtained from the assistant Secretary of the Senate of Vermont.

						,

Remarks.—The Lee Bank, in the town of Lee, has gone into operation since the first Saturday of May. The City and Globe Banks, in Boston, returned, in addition to their regular capital, the amount borrowed by them from the State, viz: the City Bank, \$100,000, and the Globe Bank, \$54,000. These sums are transferred from the column of "capital stock" to the column of "cash deposited bearing interest," and are included in it. The Eagle and State Banks, in Boston, have embraced, in the amount deposited bearing interest, the following sums, borrowed of the State, viz: the Eagle Bank, \$60,000, and the State Bank, \$39,000. The dividend of the Atlas Bank was declared for nine month

Notes.—At the winter session of 1835-286, the Legislature of Massachusetts increased the capitals of twenty-three old banks in the aggregate amount of \$3,600,000, and incorporated thirty-two new banks with an aggregate capital of \$6,720,000. See tables B B and C C. It is provided by law in Massachusetts, that no bank shall go into opera-

tion until fifty per cent. of its capital stock be paid in.

The charters of all the banks in Massachusetts will expire on the 1st of October, 1851, excepting those of the State and People's Banks, which, by

a repealing act, will terminate on the 1st of April, 1837.

Since the commencement of the present session of Congress, a copy has been received at the Treasury Department of an "abstract from the returns of banks in Massachusetts, made in October, 1836, showing the state of said banks on the first Saturday of September, 1836." The details of this abstract belong properly to the general statement of the condition of the State banks for 1836-37. But the following summary of the condition of the banks in Massachusetts, in September, 1836, is subjoined, for the sake of comparison with their condition in May, 1835.

Aggregate of one hundred and seventeen banks in Massachusetts, September, 1836.

Capital stock paid in) -	-	-	-	\$34,478,110	
Bills in circulation -		-	-	-	10,892,249

Debts due, and eonsidered doubtful	-	-	3	-	/	335,974 3	31

Rate of semi-annual dividend on amount of capital of the banks, as existing when dividend was made, a fraction less than 33 of one per cent.

It appears that between the first Saturday of September, and the time when this abstract was completed, (believed to be the latter part of November,) seven of the old banks had an increase of capital in the amount of \$591,475; and thirteen of the new banks went into operation. It being provided by law, that no bank shall go into operation till fifty per cent. of its capital stock be paid in, the capital of these thirteen new banks must be, supposing the terms of the law literally complied with, at least \$1,110,000. This will make the whole number of banks in operation in Massachusetts, on or about the 1st of December, 1836, one hundred and thirty; and the amount of their capital paid in, \$36,169,855.

The whole number of banks incorporated by the Legislature of Massa-chusetts is one hundred and thirty eight, and the amount of their capital

authorized by law is \$40,830,000.

The eireumstances which led to the enactment of the act for repealing the charters of the State Bank and the People's Bank have not been communicated to the Treasury Department; but it is believed those banks were concerned in exchange dealings, similar to those described by a committee of the Legislature of Rhode Island, in their report on the conduct of certain banks in that State. See E No. 2.

E No. 1—BANKS IN RHODE ISLAND.

ABSTRACT of the Returns of the several Banks in this State, made to the General Assembly, October session,

of the banks, to wit: Commercial, Bristol; Bagle, Bristol; Merchants', Newport; New England Commercial; Newport; Bank of Rhode Island; Rhode Island Central; and Reger Williams, have failed to comply with one of the requirements of the act entitled "An act to regulate process against banks, and for other purposes therein mentioned," inasmuch as they have not set forth in their respective returns the amount of "profits on hand." The committee to whom were referred the returns of the several banks, respectfully submit the foregoing abstract; and the committee report, that certain GEORGE CURTIS

three new banks, with an aggregate capital of \$350,000. For the names of the JOHN HORSEWELL LYNDON TAYLOR,

Committee.

Norg.-In June, 1836, the Legislature of Rhode Island incorporated new banks, see post,

E No. 2.

Report of the Committee appointed by the General Assembly of the State of Rhode Island and Providence Plantations, to visit and examine the banks in this State: made at the June session, Newport, 1836.

The undersigned were appointed a committee to visit and examine the banks in this State, at the January session of the General Assembly, 1836,

by the following resolution:

"Resolved, That Messrs. Atwell, Dorr, and Curtis be a committee of this General Assembly, to visit and examine, at their discretion, any of the banks in this State: to inquire whether they have been and are conducted and managed according to law; to inquire into violations on the part of said banks of the law regulating the interest of money, and other laws, if any such violations have taken place; to inquire what abuses of the chartered privileges of said banks require the correction of the Legislature; and, generally, to ascertain the condition of said banks; and that said committee report at the next session of this Assembly the result of their investigation, and also what further provisions of law, if any, are necessary to regulate the rate of interest and discount to be charged and taken by the incorporated banks in this State."

Authority to examine on oath the presidents, cashiers, and other officers and servants of the banks, and such other persons as they might think necessary, together with the power of sending for persons and papers, and of

enforcing their process, was also vested in the committee.

In fulfilment of the intention of the General Assembly, the committee have made as extensive an examination of the affairs of the banking corporations of the State as their other engagements would permit; and sufficiently extensive, as they believe, to exhibit the general condition of these corporations, and to justify such legislative enactments, in addition to the present laws regulating banks, and fixing the rate of legal interest, as are proposed in the conclusion of this report. The committee respectfully recommend the accompanying bill to the consideration and adoption of the Legislature.

The committee have visited and examined fifty of the sixty-one banks in this State, and have addressed letters to five others; from all which answers have been received, containing their last weekly statement, and answers to the interrogatories proposed. The banks not examined are the Bank of Bristol (the cashier being absent from the banking-house,) the Centreville, Cranston, Cumberland, Exeter, and Fall River Union Banks. Several witnesses, besides officers of the several banks, have also been examined on subjects connected with this investigation. The committee have also sought to possess themselves of the views of the most intelligent and practical business men on the subject of banking, and on the policy and operation of laws regulating the interest of money.

The mode of proceeding has been to place the cashier of a bank under oath to disclose the whole truth relative to the affairs of the same, to inspect and copy the last weekly statement, and compare it with the annual statement made to the General Assembly in October last, and to propose a series of interrogatories to the cashier. The substance of the answers of the person under examination was reduced to writing as they were made, by one of the committee, and read to the witness after the examination was:

closed, for the correction of any errors that might have occurred. This report is therefore to be understood as based upon statements made under the same sanction as those which are received in a court of justice of bloom

The examination has in every instance been made at the banking-house of the bank, to which the committee have always been readily admitted. A reluctance on the part of the cashiers of some of the banks to answer directly and explicitly the questions relating to the indirect modes of taking more than 6 per cent, interest has been sometimes manifested; but, generally, the information requested has been promptly furnished, and, in some cases, with a gratifying freedom and candor, to which the committee will take the occasion of rendering ample justice when the whole matter of the investigation shall be acted upon by the General Assembly. The committee have been refused an answer to questions, and addressed by a cashier with rudeness and insolence, in one instance, and one only; which, however, is unworthy of a more particular notice in their report.

The committee take pleasure in being able to state, in the outset, that the public confidence in the resources and stability of the banks of this State is justified by the inquiry which has been prosecuted. To one exception to this very satisfactory result, the attention of the Assembly will be hereafter directed. As was to have been expected, the investigation discloses, not that the holders of the bills of the banks have any thing to apprehend from the condition of the banks, but rather that the business portion of the community are subjected to exactions in the shape of extra interest, in various indirect modes; and that the banks are prosperous against the laws of the State which has created them, and endowed them with highly valuable and

exclusive privileges.

The labors of the committee commenced with the Scituate Bank, on the 16th of February last. This bank, after having lain dormant for some time in the hands of an individual, had been transferred and set in operation under the direction of other persons, and, as was suggested to the committee, upon a basis not firm enough to sustain the amount of its discounts and circulation. Finding that a circulation of \$12,412 upon a capital of \$14,442 was sustained by a small amount of specie and deposites, and by securities and stock notes, some of which were on long time, made by persons residing in distant places, and not readily convertible to meet any considerable demand for specie, and that the bank had no arrangement with any other to honor its check for specie upon such a demand, the committee considered themselves justified, from a regard to the public interest, in recommending to the directors of the bank that no more bills should be issued, that its discounts should be suspended, and that its notes and securities should be forthwith deposited in another bank, upon an arrangement with the same for the collection of its debts and the redemption of its bills. This recommendation was promptly acceded to, and an arrangement of the nature suggested was made with the Merchants' Bank, in the city of Providence; which arrangement still subsists. The turn which the affairs of this bank have subsequently taken, and the facts disclosed upon a second visit to the bank, on the 17th day of the present month, will be made the subject of a separate report and bill, to which the committee believe it their duty to ask the attention of the General Assembly at their present session. After visiting eight other banks in the county of Providence, the com-

After visiting eight other banks in the county of Providence, the committee were prevented by other engagements from finishing the work assigned to them. It was resumed on the 31st of May, and, after an exami-

nation of all the banks in the city of Providence, twenty in number, the committee visited such others, in the other counties in the State, as their time would permit.

To proceed with the subjects of this investigation, in the order adopted

by the committee.

It has been generally believed that the annual returns of the banks to the General Assembly, at the October session, did not furnish a satisfactory disclosure of their real condition; that the banks were prepared and set in order to make a better appearance than usual to the Legislature; and that they afterwards reverted to a condition, safe indeed, but less imposing in point of resources. This opinion is ascertained to be well founded; and we are induced to recommend, in consequence, that the law requiring returns should be repealed, so far as it directs that the same be made to the General Assembly at a definite period: and that hereafter said returns shall be made to bank commissioners once in a year or oftener, at such time or times as they shall require; and that the commissioners present a tabular statement of these returns annually to the General Assembly. This change of the present law is rendered expedient by the following statement of the condition of 44 banks, including all those in Providence, and none in Newport; the examination of the latter having been necessarily delayed till after the statement was prepared.

Forty-four Banks visited.

Upon comparing the returns in October with the corresponding items of the subsequent statements, it appears, that to meet an amount of deposites, debts and dividends unpaid, and circulation, equal to \$2,813,187 85, the forty-four banks had in October, in specie, bills of other banks, and deposites in other banks, the sum of \$986,582 97. The same banks had, at visitation, to meet an amount of deposites, debts and dividends unpaid, and circulation equal to \$3,693,604 71, in specie, bills of other banks and deposites in other banks, the sum of \$739,203 50.—Increase on debtor side as aforesaid, \$880,417 S6, including debt to the Bank of the United States of \$474,000.—Decrease of aforesaid resources, \$247,379 47.—Increase of deposites, \$340,070 69.—Increase of debts and dividends unpaid, \$406,852 17. —Increase of circulation, \$133,494.—Diminution of specie, \$289,02401.— Proportion of specie in bank to bills in circulation, in October, one dollar to every two and less than a half; at visitation, one dollar to every six and less than a half.—Increase of deposites in other banks, \$39,315 21.—Increase of bills of other banks, \$2,329 33.—Decrease of stock, real estate, &c., \$41,179 46.—Increase of profits on hand, \$78,965 52.—Increase on notes and bills receivable, \$1,652,440 75.—Increase of capital, \$426,819 93.

This statement is favorable to the banks, as compared with those in other States; but at the same time it is materially different from that deduced

from the returns at the last October session.

Some pains, it appears, are taken to make the business of the banks subserve the purpose of the annual preparation; to which the time of the paper discounted is made to refer. Deposites in other banks are drawn in, and a temporary scarcity of money, asit is technically called, or diminution of bank accommodations, is occassioned once a year, for the benefit of the return. After the return, the amount of specie either decreases suddenly, or gradually, to its old standard. In some instances, more specie was found shortly after the return than before, or an amount varying but little before and after the return; but these instances are exceptions to the general rule.

If the returns were made at a time to be fixed upon by commissioners, all efforts to assume, temporarily, a better condition than usual, becoming ineffectual, would be discontinued; the periodical pressure for money would not occur, and a wholesome check would be imposed upon any temptation to great imprudence on the part of the banks. Nor is it apprehended upon inquiry, that inconvenience would be thereby occasioned to the bor rowers of money. The annual difficulty would be removed at once; and the banks, after having exchanged the vanity of appearing better than they really are, once a year, for the desire of preserving a safe and legal condition at all times, would have no motive for withholding the extent of facili

ties to business men, which their resources will justify. The average of

accommodations through the year will not probably be diminished.

The usual dividends of the banks have been as follows:-National Bank, Providence, at the rate of 8 per cent. per annum, last at the rate of 10; Arcade, last at the rate of 9; Mount Vernon, Merchants' Bank at Providence, Rhode Island Central, at East Greenwich, and North Kingstown Banks, at the rate of 8 per cent.; Rhode Island Agricultural Bank in Johnstown, 7some years ago, 8; in 1823, 10 per cent.; Warwick Bank, 7; the last 8; Newport Exchange, two dividends only, one of 6 and one of 8 per cent.; Bank of Kent, at Coventry, from 7 to S; Woonsocket Falls Bank, Weybosset, Manufacturers', City Bank, Blackstone Canal Bank, Globe, Commercial at Providence, American, Mechanics and Manufacturers', Roger Williams, High Street, Narragansett, Landholders', New England Commercial, and Providence County Banks, 7 per cent.; North Providence Bank for 15 months 71; Citizens' Union, 5 dividends, one of 8, the rest of 6; Hope Bank, last year, $6\frac{3}{4}$; Freemen's, $6\frac{1}{2}$: Bank of Rhode Island, between 5 and 6; Commercial, at Bristol, 5; Eagle, at Bristol, for two years past, 4; New England Pacific, last dividend, 4 per cent., being the first in four years, on account of the losses in 1829. It appears that twenty-nine of the fifty-five banks to which the inquiry has been extended have divided more than 6 per cent.; one between 5 and 6; one 5, and two 4 per cent. per annum. remaining twenty-two have divided 6 per cent. This statement may be of importance hereafter, in considering the question of the interest of money, and the expediency of repealing the law against usury.

The directors of banks, or a large majority of them, have been usually found to reside in or near the town where the bank is established. The Mount Vernon Bank, in Foster, is, however, an exception; it has thirteen

directors, six of whom reside in Providence.

Discounts are for the most part made at the banks. In some instances: there is a committee of discount or circulation elsewhere. About onehalf of the discounts of the Mount Vernon Bank are made in Providence by a committee of directors. Discounts are sometimes made elsewhere for the Smithfield Lime Rock bank. The directors of the Newport Exchange Bank sometimes make purchases of paper abroad in New York, and, it was believed, in Providence; and they had a special direction to this effect. It. has been a common practice for the president of this bank thus to discount. The average amount of notes bought in New York, and on hand there, has been \$25,000. The bank, it was said, was thus obliged to go to New York, because good paper was scarce in Newport. The president has, in a few instances, bought small notes out of the bank, payable in Newport, and the bank has taken them of him at the same rate. The bank has also taken of him notes thus bought, payable at other places, and at the same rate of purchase.—In some cases, propositions for discount are received by directors elsewhere, and not acted upon, but forwarded to the bank.

This practice of discounting abroad, as diverting the bank from the object of its creation, if for no other reason, would seem to require the correc-

tion of the General Assembly.

It seemed to be of importance to ascertain whether the accommodations furnished by the banks were made to persons in or near the towns where the banks are located, in order to answer the questions whether they are wanted where they have been granted, and whether any further addition to bank capital is demanded by the public necessity in any particular place-

It appears that by far the greater part of the banks are, properly speaking, local, and managed for the accommodation of the people residing in or near the places of their location; although there are none of the banks that do not discount more or less of the paper of persons coming from a distance. A few of the banks, from the extent to which this discount is carried, can hardly be considered as local, or, judging from their operations, as being needed in the places where they are located, however serviceable to other portions of the State or country. As before stated, about one-half of the discounts of the Mount Vernon Bank are made in Providence, to people of that place. Seventy-five out of 127,000 dollars of the discounts of the Smithfield Lime Rock Bank are for the benefit of the citizens of Providence. One-half of the capital of the Newport Exchange Bank has been constantly employed in the city of New York.

In the granting of new banks, it ought to be more frequently inquired than it is, in what direction the capital of former banks has been employed, and whether an additional number in any place is really required by the wants

of the business portion of the community.

The proportion of trade to accommodation paper discounted, and of drafts to notes, has of course varied greatly at different places; but it does not appear to be necessary at present to enter into any of the particulars of this portion of the investigation.

As it respects the *time* of the paper discounted, the greatest proportion of notes has been found to be at sixty days, and of drafts and bills at four months.

An arrangement exists between the Merchants' Bank in Providence, and all but four of the banks in this State (except the Providence banks) to redeem their bills. The four banks not included in the arrangement are the Cranston, Kent, Village, and Fall River Union Banks. The permanent deposites of the banks in the Merchants' Bank vary from one to three thousand dollars each. The whole amount of deposites is about \$60,000. The collections of said banks are generally made by the Merchants' Bank. The Merchants' Bank charges them nothing for collections on New York and Boston; on Philadelphia, from $\frac{1}{8}$ to $\frac{1}{4}$ of one per cent.; on Baltimore, $\frac{1}{2}$; on other places in Rhode Island $\frac{1}{4}$; on other places in Massachusetts, what the bank is charged for the same by the Suffolk Bank in Boston. Said Rhode Island banks were paying to the Merchants', on the 30th of May, an interest on \$200,000. The Merchants' Bank receives at par, from the banks with which it has an arrangement, the bills of all other banks in New England, except of those in the same town where the bank is situated. Where the balance is against a bank, upon the amount of its bills collected, and the permanent deposite would be thus trenched upon, interest is charged. The interest accounts are closed, and the balances carried forward, once a montli.

An arrangement also exists between the Merchants' Bank and the Suffolk Bank in Boston, as follows:—The former receives at par from the latter all the bills of banks in this State, except the four above mentioned. It remits at par bills of all the banks in the New England States, except Rhode Island. The Merchants' Bank pays interest on any balance against it; the Suffolk Bank pays none. This arrangement is the basis of that with the other banks, as before stated.

Interest on deposites made therein is paid by some of the banks; but generally on small sums, and not exceeding 5 per cent. The Bank of North America, in Providence, is an exception to this statement. The amount of

borrowed money in that bank is \$100,000: its capital also is \$100,000. Interest at the rate of 6 per cent is paid on this loan to the bank, which is made by stockholders in the same. The first loan to the bank was \$23,000 in July, 1825. It was afterwards increased to \$40,000 and to \$50,000,

until it amounted in January, 1826, to the present sum.

The bank process has been used in few instances where the money discounted was retained in bank from the holders of notes, or other collateral security was held by the same; and the process was thus loaned for the benefit of endorsers. This practice is deserving of the censure of the General Assembly. The bank process was not given for a purpose like this. It is liable to other objections regarding the borrower himself and his other creditors; besides encouraging, in some instances, improvident loans. No good reason can be given for its longer continuance. A large portion of the banks, from the inquiries we have made, would not object to its abolition; and a majority of the committee, being of opinion that the powers conferred on banking corporations are sufficiently extensive, without the addition of this marked and exclusive privilege, have reported a provision in the bill annexed, for limiting the banks hereafter to the same remedics for the collection of debts as are possessed by individuals in this State.

The subjects of the report have thus far been passed over without much minuteness of detail in hastening to one which was the leading inducement of the General Assembly to institute this investigation, viz: the interest on money taken by the banks. Should further information be desired on any point preceding, not sufficiently explained, the committee are ready to submit the particulars to the Assembly, and to answer such questions as may

be addressed to them.

There has been a difference in the answers of the cashiers of banks, upon the usual question being put—whether the bank has taken, directly or indirectly, lately, or at any time, more than 6 per cent. interest on notes or drafts? The answer has been sometimes very promptly and frankly made, that it has; but more frequently the facts have been stated, and the inference left to the committee. These facts we will now proceed to state to the Legislature in the words taken down at the examination, as nearly as may be, submitting the inference to their own judgment, and commencing with the Merchants'

Bank in the city of Providence.

The highest rate of exchange charged at this bank, as stated by the cashier, is two per cent. on drafts upon Philadelphia at four months, in addition to the legal interest of 6 per cent., making a rate of interest equal to 12 per cent. per annum. On New York, 11 has been charged. The average rate of exchange is said, however, probably not to exceed 1 per cent, on the same paper, making, with interest, 9 per cent. per annum. The rate of exchange depends somewhat upon the times, and somewhat upon the persons applying. A higher rate being sometimes charged on Philadelphia than on New York, the difference is according to the time charged in New York for collecting on Philadelphia. On drafts upon Charleston and New Orleans, of same time as before mentioned, one quarter per cent. is charged, in addition to the charge in New York for collecting such drafts. Higher rates have been offered at this bank on drafts generally than have been charged. More than 6 per cent, has been sometimes charged also upon notes. When money has been wanted upon a subsequent day, 6 per cent! interest has Theen taken for the time, and a bonus in addition. A bonus has also been charged when money was wanted on the same day it was discounted. The view has been to make the discount on notes equal to the interest and exchange on drafts in some cases. The amount deducted from notes discounted for persons out of the bank has generally been less than from those discounted for the directors. The bonus on notes, besides interest, has not exceeded one per cent. The average would not be more than one-half per cent. on notes of persons "out of doors." The principal part of the notes discounted is for the board of directors. The bonus spoken of is sometimes taken directly, and sometimes indirectly, by agreeing to give checks on other places, and purchasing them back at a discount; sometimes by giving current money and buying it back; sometimes by the proceeds of the discount remaining a given time. In the latter case, the money is sometimes paid before the stipulated period arrives, deducting the interest for the unexpired time. These modes of operation are frequent when money is scarce.

The last rate of exchange taken by the National Bank, at Providence, on a draft on New York at four months, was three-fourths of one per cent. in addition to the interest, being at the rate of $8\frac{1}{4}$ per cent. per annum. One and a half per cent, and interest have been taken on a draft at six months, being at the rate of nine per cent. Where drafts are discounted for circulation, the usual exchange is one-half per cent. On checks on New York, payable in eight or ten days, they have charged sometimes as much as onehalf per cent., premium and interest; sometimes they have charged one-half per cent. discount on checks on New York, payable at sight. In two or three instances, they have taken checks drawn by individuals on banks in Providence, having about one week to run, and charged double interest. These discounts were made for the benefit of the drawers. They have, in a few instances, where they discounted in checks on New York, purchased the checks back. The cashier recollects no case in which, by the whole of this process, more than one per cent. was taken, besides interest. Payment is sometimes made in current money, and the money purchased back. A large proportion of the notes discounted has been for circulation; and in such cases six per cent. interest only has been charged. Except in cases of the purchase of checks, as before stated, the bank has not, in the recollection of the cashier, taken, directly or indirectly, upon notes and drafts, more than one-quarter per cent. additional interest per month; except in some instances on drafts having less than sixty days to run. With the exception of the above-mentioned checks, the bank has, by no process, ever taken such sums as would amount to 12 per cent. per annum. The dividends are accounted for by the extent of the circulation, and from having profited considerably by the purchase of checks at short dates. Sometimes current money never passes, but the discount is at once charged. Except where discounts were made for circulation, it has been the aim of the bank to of tain the market price of money. But a small portion of the discounted had been made on short checks or drafts. Three-quarters of the notes discounted have been for circulation, and, with few exceptions, without extra interest.

At the Union Bank, in Providence, the highest rate of exchange on dia's, at four months, has been one per cent.; in some instances paid in current money, the party having the option to take it away. The present rate of exchange is three-fourths per cent. on four months' diafts and under, on New York, Philadelphia, and Boston; one per cent. on Baltimore. Discounts have been sometimes paid in checks on other places, with an un-

derstanding that they should be sold back at a discount; not, however, re-Checks have sometimes been paid out as the proceeds of discounts, at an advance of one-half per cent., and sometimes at three-fourths. Within a year, they have taken as high as one per cent. on checks, in addition to the time the checks had to run. They have discounted notes, and made accommodation loans, and paid in checks at these rates. The lengest time of such checks has been thirty days; the average from fifteen to twenty days. Exchange on a draft and premium on a check have not been charged in the same transaction. The object is to make the profit accruing on the discounting of notes equal to that on drafts. They have sometimes made. discounts payable in current money, without having it at the time on hand, but could always procure it. Latterly, for a year past, it has always been at the option of the party to take the money away. They rarely impose as a condition of the discount, that the money shall lie in bank; this is generally done upon the proposition of the applicant. The rate of exchange is determined partly, perhaps, by the state of the money market, and much by the rates established by other banks. Notes payable at banks in the vicinity are never taken, except in cases of supposed bona fide transactions, and then they are discounted as bills of exchange. In one or two cases, a draft drawn by a person in, Providence, and accepted also by a person residing there, has been discounted, and a discount, besides the interest, taken of onehalf per cent. .

The highest exchange charged at the Bank of North America, in Providence, has been at the rate of one per cent. on four months, on New York, in addition to the interest. The rates at this bank are fixed and uniform. Much greater offers have been made than the highest rates ever charged. The

rate of exchange charged is determined by the value of the money.

The Mechanics' and Manufacturers' Bank, in Providence, has, in one instance, lately, charged on a draft on New York, having about four months to run, $2\frac{3}{4}$ per cent. besides interest. It had previously gone as high as one per cent., on four months' paper, but generally charges one-quarter per cent. to customers. The greatest aggregate of deduction on any note, payable in Providence, would amount to nine per cent. per annum.

The highest interest and exchange on drafts at the Weybosset Bank, has been at the rate of nine per cent. per annum: at the Exchange Bank, Providence, in a few instances, between eight and nine per cent.; more frequently seven and a half. The general rate of interest, on notes at this bank would not exceed six and a quarter per cent. A large portion of such

discounts is made at six per cent.

The highest rate of exchange, at the *Providence Bank*, has been one-half per cent. on four months' drafts, and no distinction made with regard to drafts on New York, Philadelphia, Baltimore, and Boston. On Mobile,

two per cent. has been charged.

Exchange at the Arcade Bank, Providence, was, at the time of visitation, June 1st, one-half per cent. on four months' drafts on New Yerk, Philadelphia, Baltimore, Boston, and Hartford; on New Orleans, Mobile, and Cincinnati, 1½ per cent. Until the 21st of May, the rate on New York, Philadelphia, &c., was one-fourth of one per cent.

At the *Mechanics' Bank*, Providence, exchange has been, for some months past, one-fourth on drafts at sixty days, upon Boston and New York; one-half on four months, three-fourths over four months; on Philadelphia and Baltimore, one-fourth more. Applicants have offered as high

as one per eent, per month. Current money discounted is frequently purehased back at one-fourth per cent. discount. On four months' notes, ehecks abroad are agreed to be given, with the understanding, generally, that they are to be sold back at one-half per cent. discount. If the check is taken, one-half per cent. premium is charged. The object is, in general, to make the discount on notes equal to that on drafts on New York and Boston. The rate of exchange is determined ehiefly, it is apprehended, by the state of the money market. It is, however, intended to keep the rate below the fair value or price of money at the time.

The Phanix Bank and the City Bank, Providence, have never exceeded three-fourths of one per cent. exchange; that rate was charged on four months' drafts on New York and Philadelphia; and on Baltimore, by the

The Blackstone Canal Bank, Providence, sometimes makes discounts payable in current money, and charges a discount upon the money, without its having passed. This discount is higher or lower according to the time the paper has to run. The greatest rate has been one per cent. The present rate of exchange, on four months' paper, upon New York, Philadelphia, and Baltimore, is one per-cent. No instance of a higher charge is recollected. The rates are considered to depend on the state of the money market Discounts have been made payable in ehecks on other places; the checks were never purchased back. Cheeks for discounts have sometimes been given payable at a future day; in one instance, twenty-one days This bank has sometimes made discounts at a less rate for directors than for persons "out of doors."

The Commercial, Globe, American, Eagle, Roger Williams, and High Street Banks, in Providence, have all taken as high as nine per cent. per annum on drafts, including exchange; but have varied considerably from

each other in their rates at different times.

There is one exception to all the other banks in Providence, which ought to be honorably mentioned. The Manufacturers' Bank charges no exchange on Boston, New York, Philadelphia, or Baltimore, nor on any other place, to any greater extent than is deemed necessary to pay the cost of collection. In this case, the charge is usually one-quarter per cent., sometimes adding the postage. Discounts are frequently made, when it is suggested by the applicant, as an inducement, that the proceeds will remain until a certain day in deposite. It is never made a condition of the discount The time has very seldom extended to thirty days; that they shall so lie. ordinarily, from one day to two or three weeks. Current money has been frequently discounted, and has been sometimes exchanged, but it might always have been taken elsewhere.

The North Providence Bank has charged at the rate of 12 per cent., including exchange, on four months' drafts recently; till lately, never more than 71. One-quarter per cent. has been charged on notes payable in Providence. Discounts have sometimes been made on sixty and ninety days' paper, on condition that the money shall lie thirty days in bank; also, in current money, with a condition that bankable money there should be pur-

chased at a premium.

The New England Pacific Bank, in North Providence, has not recently charged more than six per cent. on notes payable at bank. One fourth, onehalf, and one per cent. exchange, have been charged on four months' drafts upon Providence, Boston, and New York. One per cent. is the highest

charge ever made, within the knowledge of the cashier, who has been in the bank three years. The drafts on Providence were not fictitious, but drawn in the course of business. The rate varies according to the state of the money market. Nothing is charged by the Roger Williams Bank, in Providence, for the collections of this bank there, or in Boston or New York. This bank has charged, on notes payable in Providence, New York, and other places, the same rates as upon drafts. In a few instances the same charge has been made on drafts payable in North Providence, drawn in Smithfield and elsewhere, as upon other drafts; in one instance, one per cent. on a four months' draft.

The Commercial Bank, in Bristol, has charged at the rate of $10\frac{1}{2}$ per cent, in two cases. The Eagle Bank, in the same place, $6\frac{1}{2}$ in one instance only, and has in no other, directly or indirectly, taken more than 6 per

cent.

The Hope Bank, Warren, has charged 7, in a few instances 9, and

lately, on a note payable in New Bedford, 12 per cent.

The Warren. Bank has never exceeded one-half per cent. exchange; that was charged on four months' drafts on Boston, New York, and Baltimore. The Union Bank charges it nothing for collecting on these places. On four months' notes, payable out of town, one-fourth per cent. has sometimes been charged; on six months' notes, one-half per cent.

The Pawtuxet Bank has charged one-half per cent. on a four months'

draft on Providence, which it cost nothing to collect.

The Warwick Bank, in one instance, has charged 12 per cent. on a note. The Mount Vernon, Village, Rhode Island Central, and Wakefield Banks, are not entirely free from the charge of exceeding the legal interest of 6 per cent.

TWhat was said in justice to the Manufacturers' Bank in Providence, may be applied, with the same truth, to the Agricultural Bank in Johnston.

The Smithfield Exchange Bank, since 1829, and the Newport Bank, with a slight exception, are free from the charge of taking extra interest. The North Kingstown and Landholders' Banks also, with the exception of requiring discounts to lie for a short time.

The Narragansett, Merchants' Bank of Newport, Freemen's Bank, Bristol, New England Commercial, Rhode Island Union, Bank of Rhode Island, Smithfield Union, Pascoag, Franklin, and Woonsocket Falks Banks, are entirely exonerated from any charge of extra interest; the

two former not charging the costs of collection.

This detail, which, however necessary, must be, in many parts, far from ratifying to the Assembly, shall be brought to a close after adverting briefly to the conduct of two other banks—the Smithfield Lime Rock,

and Newport Exchange.

At the Smithfield Lime Rock, the highest rate of interest charged was 24 per cent., as far back, however, as 1829. No illegal interest has been taken on notes payable at the bank; but it has been taken on notes payable at other places within the town of Smithfield. The additional interest is generally $\frac{1}{4}$ per cent. In no instance has more than at the rate of 8 per cent, been charged on this paper. On notes payable in Providence, "as much as we can get;" in one instance, 1 per cent, per month. Nothing is charged for collection in Providence. The most charged on drafts has been at the rate of 12 per cent, per annum, including interest. The greater part of the paper taken by them is at the rate of 6 per cent.

4

It has been already seen that one-half of the capital of the Newpor Exchange Bank is used in the city of New York; it conforms, also, in some degree, to the practice of that place in the rate of its charge of interest. One-half per cent. is charged on 3 or 4 months' drafts on New Bedford, making a rate of $7\frac{1}{2}$ and 8 per cent. per annum. One and one-half percent. advance has lately been charged in one instance, on the check of the bank upon New York, payable at sight. The president has purchased notes payable in New York at a discount, as in the following instance: Principal, \$9,000; interest, \$261 S1; premium, \$251 S1; time of note to run, 169 days. A check was drawn on New York for the funds of this discount. This mode of discounting has been common; and the funds in the case aforesaid resulted from former notes purchased in a similar manner. The rate of discount varies with the money market. From $\frac{1}{4}$ to 2 per cent, has been charged on paper, generally, at 4 months, on New York, Philadelphia, Baltimore, Washington, and Alexandria. The rate has varied on different places with the cost of collection. No higher rate has been offered at the bank than the above charged. From \frac{1}{4} to 1 per cent. has been given for eollecting. One fourth is the highest paid to the Merchants' Bank on this account. They have paid the Phænix Bank, New York, as high as from 3 to 1 per They have discounted ont their cheek on other cent. for collections. places at a premium not above $\frac{1}{2}$ per cent. Notes payable in Newport have been bought by the president, in a few instances, out of doors, at a discount exceeding interest, and turned into the bank at the same rate. The highest rate recollected upon these notes is 12 per cent. There may have been cases higher, but the notes were small. One per cent. a month extra, at the rate of 18 per cent. a year, is the highest rate recollected on notes payable in other places, purchased by the president, and taken of him by the bank. Most of the money lent in New York has been for 6 per The bank then rose to 7, 9, and 12 per cent. On New York investments they have realized from 6 to 12 per cent.

The Providence County Bank, the Citizens' Union, Bank of Kent, and the Washington and Phænix Banks in Westerly, are not included in the aforesaid statement of interest charged by banks, not having been visited

and interrogated in person by the committee.

It will thus be seen that the practice of taking more than the legal interest is a common and ordinary practice in the banks of this State, some of which avow that it is a part of their plan of operations to make the rate upon notes by some mode or other equal to that upon drafts. The business of the banks has taken a turn to favor the practice, in the substitution The exchange charged cannot be sheltered for of drafts for notes. a moment under the protection of the statute fixing legal interest, which allows the course of exchange to be taken by the lenders of money. There is a natural rate of exchange fairly chargeable, and which the law, no doubt, had in contemplation, founded upon the cost of the transmission of funds, time lost, insurance, &c. But what is the rate in the banks of Rhode Island? It is perpetually varying in different banks—in some exeessive, and in others moderate, at the same time. When one bank charges one and a half per eent. on a four months' draft on New York, another a quarter or half on the same paper on the same day, and another one per cent. on the same, without being at any cost of collection, it is idle to set down all these rates as the rates of exchange intended by the law. It wil also be observed, that these rates vary with the avarice of the lenders, th

necessity of the borrower, the state of the money market, and the charges of other banks. The force of example and rivalry among the banking institutions is very remarkable in the matter of interest. One bank, by raising the rate of exchange, or resorting to some new indirect mode of receiving interest, will soon draw many others after it. The miser's plea, of the necessity he is under to provide for his family, suggests to the direetors of banks a similar duty toward stockholders. And thus practices are introduced and sustained, which many who adopt them no doubt regret. The committee noticed, in the course of their investigation, the very eommon apology connected with answers to the questions relating to interest, that the bank then under examination served its customers a little eheaper This practice of taking high exchange being, then, nothing than any other. more nor less than downright usury, affords no protection to the contrivance of substituting notes payable elsewhere for notes at bank, and charging upon them as on drafts.

In a few instances, the highly improper practice, not before alluded to, of obtaining an additional interest by dating back for some days the renewed note, is still continued; but it is to be hoped that its entire disuse will pre-

vent the necessity of any enactment to prohibit it.

Without recapitulating or reviewing more particularly the evidence which has been presented relating to the conduct of the banks in violating the law fixing a legal-rate of interest, the first reflection which suggests itself is, that the duty which good citizens owe to the State has been too long and too boldly disregarded. In free States, where the laws are made by the people, and for the general good of the people, and can be abrogated by the power from which they proceeded, there is no excuse for disregarding and setting them at naught. And it is not a little remarkable that the portion of our fellow-citizens who exercise the privilege of evading or annulling the usury law of this State, and who possess no small portion of intelligence and influence, have never yet approached the General Assembly with any remonstrance against the legislation of which they complain. The law regulating interest was passed long before the grant of the first bank charter in this State; and all charters have been accepted subject, of eourse, to that law.*

If the establishment of an exclusive rate of interest by law is a hardship to those who coutrol the active capital of the State, why has no representation to that effect ever been made to the General Assembly, that the policy of the law may become a subject of investigation? This neglect deprives the advocates of a free trade in money of all excuse. If the law require alterations or improvements, an enlightened public opinion, formed by the dissemination of more correct doctrines of political economy, will, in the end, accomplish the desired result. But a defiance of the law, without the slightest recurrence to the only legitimate mode of amending it if wrong, leaves no alternative to the Legislature but the enforcement of it by new enactments, if the old have been found inefficient. The committee have reported such an addition to the law fixing the rate of legal interest as ap-

pears to them to be required by the present exigency.

4

^{*}In the constitution of the Providence Bank, incorporated in 1791, among other advantages of banks is mentioned, "by discount rendering casy and expeditious the anticipation of runds on legal interest." It is also worthy of notice, that the charters of the two first banks, the Providence and the Bank of Rhode Island, were published in the Digest of 1798, among the public laws of the State; a proof that the Legislature considered a bank charter to be a trust in the hands of individuals for the common good.

The corrupting effect of this evasion and violation of the law cannot escape the observation of any reflecting man. A strong sense of demerit is marked by the various shifts and subterfuges resorted to in the exaction of illegal interest; and when men of high character are found willing to practise the contrivances that have been detailed, is there not too much reason to apprehend a decline in public sentiment? May not the race of young men, who are coming forward as the successors to those who now occupy the places of trade and commerce, be led to waver in their attachment to the old fashioned rules of plain dealing, by the example of the day; and to consider them not as founded in nature and right, but as being a part of the fashion of the time, which, like other fashions, may be laid aside to serve a temporary interest or convenience? Every tendency to deterioration in the mercantile character is deeply to be deplored by all who regard the true causes of public prosperity. A high standard of integrity in business men is one of the most important and effective. Let us beware of encroachments upon it by the selfish and avaricious temper of the times.

Upon hearing the facts related, every one will assent to the conclusion that the usury law ought to be enforced, or forthwith repealed. There is no middle course. Public duty forbids any other on the part of the Legislature. The question then arises, whether any evidence is now before it which would justify the latter alternative; if not, then additional enactments are required to restrain the banking corporations of the State.

As before observed, there is no statement or proof before the Legislature, from the proprietors and directors of these corporations, to show that the present rate of interest is too low, or that any law affecting it is a useless restraint upon the transactions between the borrower and the lender. What reason is offered, therefore, for throwing down the present barriers, in favor of the banks? The committee have given to this subject the best consideration which their time and opportunities would permit; and feel obliged to state, as the strong and decided conclusion to which they have arrived, that not only does no such reason exist, but that there is reason to the contrary strongly preponderating on the side of the law, certainly against moneyed corporations. The committee do not intend to occupy the time of the Assembly with a long discussion of the theory of the interest of money, and of usury laws in general. They do not consider that this is the best occasion for so doing; nor could it be thoroughly done, without a far greater preparation than the present opportunity will permit. All that we shall do is, to offer a few such remarks as occur to the common sense of plain men.

The banks, then, do not seem entitled to ask the repeal of the present law on the score of privilege or of profit. The privileges conferred by this Assembly on banks are highly valuable, and in some respects exclusive. No better proof of this can be needed than the eagerness with which acts of incorporation for banks are sought for in this State, and the great amount of capital invested in them. They furnish safe and profitable places of investment for the surplus funds which have been accumulated, and a reasonable and very valuable return to the stockholders upon their investments, varying from 4 to 10 per cent. per annum, and very seldom falling short of 6; and this, too, with little trouble to them, except in the selection of judicious managers and directors. Men are always readily found to assume this responsibility without compensation, on account of the great advantages resulting from the appointment. The money-making power, which, under all forms of government, is one of the principal attributes of

sovereignty, is delegated to them; and they are authorized to issue bills for circulation, which, to all intents and purposes, constitute the currency of the State. This power of issuing bills of credit, which would seem, by the constitution of the United States, to belong exclusively to the Government of the United States, is not only assumed by this State, in common with others, but delegated to portions of its citizens. In a part of these corporations, the stockholders are not liable in their private property for the corporate debts; and to all, a process is at present allowed for the collection of debts, which is more sure, certain, and expeditious, than that provided for the citizens of the State. The great powers thus conferred very naturally exert themselves to the advantage of those who enjoy them. advantage and accommodation, it is true, are, or ought to be, the grounds on which banks are granted; but individuals are the great gainers in power and profit. The bank property of the State has therefore come to be the ruling property of the State. All other kinds of property are secondary and tributary to it, and moved by it. Their value is regulated by it. commands the greatest income. The income from land does not exceed 4 per cent. in this State. Taking together all who have engaged in manufactures in this State, those who have failed as well as those who have succeeded, and the average profit to each would fall below that on land. On the other hand, 6 per cent. interest is a moderate income from bank stock. The latter is also a readily convertible property; and the owner can transfer it, without delay, into any other shape of investment; which is not the case with fixed property in land or manufactures. And if the bank stockholder become jealous of the prosperity of merchants or manufacturers, he ought not to attempt to rival them, without risk or enterprise, by demanding excessive interest; but to change the form of his investment, which he can so easily do, and to submit to all the chances of fluctuation and loss which belong to active business.

1 It is the money privilege through which bank property is enabled to move and control all the rest, and to raise and depress its value. The active capital of the State is drawn into banks, and is not to be procured, generally speaking, out of them. The race of private money-lenders has dwindled away. The loan of money must now be sought at the counter of a bank; and the terms are fixed by members of, a corporation, sitting with a divided responsibility, and doing many acts, as experience has taught, which they would regret to have done in their private eapacity. The pecuniary wants of the business community must be satisfied here or no where. The banks, possessing probably not far from one-fourth of all the property in the State, are the depositories of the business facilities of our active and enterprising population. Here, then, is the great element of their power; so strong as to justify and render necessary an interference on the part of the State between the bank and the individual borrower, to fix by law the highest sum which may be demanded of him for the loan of money. Money, which our corporations to every purpose are empowered by the Legislature to make, being the standard of value, and the medium for interchanging all the products of labor, is the prime and universal necessity of all business men. Their operations must be sustained and carried forward by the accommodations of the banks. The wealthy and substantial business man needs them as much as the speculator; and, as the history of the industry of this State proves, may be, at times, as much in the power of the banks as the latter. The former, in severe and pressing

times, has more ability to check his own enterprise. The latter must go on, and be accommodated or ruined-sometimes by the accommodation. This State (and it may be said the country) has been built up by men of originally small means, and great enterprise and industry. It is this class of men (we may call them public benefactors) who have the most need of the facilities furnished by banks; and it is of these men that the Legislature means to take care, when it imposes upon the lenders a check, in the shape of a usury law, against their strong temptation from selfishness or avarice. Without loans and discounts, business must be suspended; the merchant or manufacturer must have them; he must go to the bank after them, and, as a necessary conclusion, the bank has him very much in its power. It is at this point that the theorist in money, who wishes to carry into money transactions the doctrines of free trade, is met with a distinction, in the nature of things, which has seemed to the common sense of mankind, in all ages, and in the most civilized countries, to the present day, to require legislative interposition Money must be had by the business man. If he does not like to give the present price for flour, or other articles of subsistence, he can substitute others, and wait for a change in the market. If he does not wish to take the chance of the price of cotton three months hence, he can lay in his necessary supply. But his money he must have now—this week, to-day, and before the close of bank hours to-day. successful in his application, he fails; his property is sacrificed, and he is turned upon the world to begin again. The absoluteness of the necessity, and the time of the necessity, are, then, what distinguish the demand for money from all other demands, and require, certainly as it regards corporations, some degree of legislative interference. In the contract for the loan of money, the parties do not meet on equal terms, the advantage being generally on the side of the lender.

It is curious to observe, in examining the history of legislation, that under peculiar circumstances in comparatively recent times, and very frequently in those more remote, this legislation has been extended to other articles besides money, usually the necessaries of life. Laws regulating the prices of different articles were carried to an inconsiderate and ridiculous extent. The necessity which then appeared to justify them has disappeared in modern times almost entirely. Such laws have not been altogether unknown in this country, nor in this State. And a condition of things can be supposed (though not likely to occur since the great extension of commerce and of the facilities of intercourse among all parts of the world) in which such laws would no doubt be revived for a time, and be sustained by public opinion; as in the case of a famine, where the means of subsistence were accumulated in a few hands, and could not be procured by the people, but at an enormous sacrifice. The necessity with regard to money being perpetual, the usury law is a standing, perpetual law, in almost all parts of the world. 'This State, having delegated its sovereignty to bank corporations (which contain and control the active capital of the State) for the supply of this necessity, is bound to look to the manner in

which it is furnished.

It is in times of a scarcity of money that the policy of some restriction on the rate of interest is most apparent. In a new country like this, in which enterprise is very great in proportion to capital, there is naturally a great demand for money; and a just interest for the loan of it is higher than in old countries that abound in capital. The rate ought to be fixed

high enough to give a reasonable range to fluctuations of value. But if there were no determinate rate, the business community would know no end to exactions upon them. Although the present law is set at naught in too many cases, yet there is no doubt that it operates as a check on the undue love of gain. In the most severe times, the rate of interest and exchange has never been so high in the Providence banks as it has been out of bank in Boston and New York. In time of pressure in the money market, interest under the name of exchange begins to rise. A few banks lead the way, and others follow; some, however, remaining far behind. increased rate, it ought to be remembered, adds nothing to the amount to The bank can loan what it has to loan for a lower as be loaned in bank. well as a higher sum. The pressure is the pretence, not the necessity, for These pressures are occasioned by the extension of the higher charge. enterprise, and an improvident profuseness of loans, combined with local causes. They are mitigated or terminated either by bankruptcy, more of less general; by the introduction of, and discount upon, new capital; or by the curtailment of enterprise. These periodical difficulties, which so much increase the power over the borrower of money, require the barrier of a

legal provision for his protection.

The committee have listened with great attention to the opinion of some very practical and able men of business, on the subject of restraining the banks to the legal rate of interest, and regulating exchange. There is a great difference of opinion among them. Taking counsel from their fears, many are inclined to question the policy of any further legislative action. The apprehension is, that capital may be driven away from the State, and that the borrower will be compelled to pursue it in various circuitous modes, and at a still higher rate of interest. But we are not of this opinion. Those banks which would send their capital out of the State, under any increased strictness of the law, will do so now, upon the temptation of high rates. The majority of the banks, the committee believe, are willing to live among our fellow-citizens, and to promote the public prosperity by their accommodations. The idea that our bank proprietors will not loan their money here, without the liberty of exacting, through the various devices of brokerage, the uttermost farthing from the necessities of the public, and that, if they are deprived of this liberty, their capital will be transferred to Wall street, to be used under cover, as the proprietors would be ashamed to use it themselves here or elsewhere, is too discreditable to the mercantile community to be entertained for a moment. The committee venture the prediction, that the act proposed by them, in addition to the law regulating interest, will, after some complaint, be acquiesced in and approved by the banks, as it is now demanded by public opinion. The sconer the banks are restored from brokers' shops to the places they were meant to be, and conducted on just banking principles, for the good of the public, the better it will be for themselves, as well as for the people of this State. tion of the banks is now directed to the proceedings of the Legislature; and if some decided evidence of dissatisfaction with the practices enumerated is not given at this session of the Assembly, those practices will hereafter be considered as justified by a legislative construction of the law of usury, and become the foundation of still greater exactions.

Time does not permit to go further at present into this part of the general inquiry. What has been briefly stated is intended as a basis for other remarks and explanations, when the whole subject shall be under the discus-

sion of the House. We will pass over very briefly the remaining provisions recommended in the bill.

A large number of banks have made their way through the General Assembly, not so much because they were wanted where located, as to appease the importunity of persons claiming to have as good a right as other applicants who had preceded them. If banks were granted not to individuals, but to communities, and subscription books were opened to the public, it is believed that the Assembly would be relieved from many applications now made from merely selfish and private motives. The committee strongly recommend a change in the mode of granting banks, as provided in the bill. It has been adopted in other States; and would, no doubt, have a salutary operation in our own.

A majority of the committee also recommend that no bank charter shall hereafter be granted without a vote of two-thirds in each House. This provision would impose a desirable check upon the too great facility in granting bank charters in numbers so disproportionate to the population and territory

of the State.

A provision, that hereafter no person shall be elected a director in any bank unless he be a resident in the State; and another, prescribing that no bank shall be incorporated with a smaller capital than \$50,000, will diminish the temptation to purchase the greater part of their stock for improper

purposes.

The committee, without desiring to magnify the importance of their own labors, are decidedly of opinion that the visitorial power of the General Assembly ought hereafter to be exercised through general bank commissioners. Borrowers of money who suffer from illegal exactions do not often resort to the remedy provided by law; and the preventive effect of a standing committee of inquiry will therefore be of great value to this portion of the community. The possibility of the failure of banks, of course, increases with their number; and every case of this kind is a deep injury to the other banks, and to the banking credit of the State. The banks of Rhode Island are in a sound state at present, and they should be kept so. A timely visit to the Farmers' Exchange, or Burrillville Bank, would have prevented the explosion of both; and if a visiting committee should be able to do no more, in the course of years, than to avert one such calamity, they would render no mean service to the State.

The action of a standing committee would place an effectual negative on the opinion that has been to some extent entertained among us, that a bank, when created and organized, is beyond the reach of the creating power. This idea of "vested rights," which, in a true and proper sense, the committee would be among the last men in this House to call in question, when made to afford to corporations a shelter from scrutiny and responsibility,

cannot be too strongly discountenanced by the General Assembly.

A power is proposed to be given to the Supreme Court, to cite and enjoin a bank, upon the complaint of the commissioners, in certain cases. The necessity of this power to aid the commissioners in their endeavors to prevent a bank from doing injury to the community, must be apparent to every one.

On the subject of banking, generally, the committee are desirous of supplying some of the deficiencies of this report, by respectfully recommending, in conclusion, a recurrence on the part of the Assembly to the very able report of the committee upon the subject of an increase of banking

capital in this State, made to the House in 1826. Many of the arguments and deductions of that report have acquired additional force in the lapse of time, and have been confirmed by the results of the late examination.

Respectfully submitted by

S. Y. ATWELL, T. W. DORR, G. CURTIS, Committee

NEWPORT, June 23, 1836.

BANK ACT.

[PASSED JUNE SESSION, A. D. 1836.]

STATE OF RHODE ISLAND AND PROVIDENCE PLANTATIONS.

In General Assembly, June session, A. D. 1836.

An Act in addition to an act entitled "An act to regulate process against banks, and for other purposes therein mentioned;" and also in addition to an act entitled "An act fixing the rate of legal interest."

Be it enacted by the General Assembly, and by the authority thereof it is enacted, as follows:

Section 1. Every act hereafter passed by the General Assembly authorizing the establishment of a bank, (savings banks excepted,) shall incorporate no other persons than the stockholders of such bank, made such

in manner hereinafter provided, their successors and assigns.

SEC. 2. In every such act there shall be named and appointed not less than three commissioners. whose duty it shall be, at a time and place, or times and places, to be specified in the act, to open a book or books of subscription for the capital stock of the bank incorporated by such act, in the town or city wherein such bank shall be located, the inhabitants of which town or city, and the inhabitants of any town in the same county, shall have a preference in the subscription. Twenty days' public notice of the time and place for receiving such subscriptions shall be given by the commissioners, in at least two newspapers printed within the State. If those having a preference as aforesaid shall subscribe for more than the whole number of shares limited in the charter of such bank, then the commissioners shall distribute the stock among them in ratable proportion, as near as may be: reducing no subscription, however, below a certain limit, to be fixed in the charter. If they shall subscribe for less than the whole number, and other persons shall subscribe for more than enough to supply the deficiency, then the commissioners shall distribute in ratable propertion, as near as may be among such other persons, so many shares, as in addition to the shares subscribed for by said inhabitants, shall make up the number limited in the charter. When the subscription shall be completed, the commissioners shall forthwith cause a copy thereof, together with a topy of their apportionment, if any shall have been necessary, to be pubished, at the expense of the bank, in a newspaper of the town wherein the unk shall be by its charter located, if any be printed therein: otherwise, in

some one of the newspapers printed in Newport or Providence. The commissioners shall also make an immediate return of the subscription in detail, with their apportionment, to the Secretary of State, who shall keep a regular file of all such returns, and thereupon the persons appearing by such return to be entitled to the stock of the bank shall have and exercise, as a body corporate, all the rights, powers, and privileges conferred by the act of incorporation, under the limitations and restrictions imposed by law; and they shall be forthwith convened by the commissioners for the purpose of organizing the corporation and proceeding in the transaction of their A majority of the commissioners shall be competent to act. Their compensation shall be provided for in the charter. Before proceeding to the execution of their duties, they shall be sworn or affirmed before some competent magistrate, faithfully and impartially to discharge the same according to law. And the magistrate administering the oath or affirmation shall, without delay, furnish the commissioners with a certificate thereof; which certificate the commissioners shall transmit with their return of the subscription and apportionment to the Secretary of State.

Sec. 3. No bank shall be incorporated with a less capital than fifty

thousand dollars.

Sec. 4. No bank shall go into operation until one-half its capital stock shall be actually paid in, to the satisfaction of the commissioners; upon whose certificate to that effect, furnished to the cashier, banking business may be commenced. A copy of such certificate shall be transmitted by the commissioners to the Secretary of State, to be by him laid before the General Assembly. The remaining half of said capital shall be paid in within six months from the time the bank shall commence operations. The payment of the whole shall be effected within one year from the date of the act of incorporation; otherwise, the charter of the bank shall be forfeited.

Sec. 5. The capital stock of any bank shall not be reduced by a division of any part of the same, without the consent of the General Assembly. And if, by reason of losses, the capital stock of any bank shall be diminished one-fourth part or more of the whole sum fixed by the charter of such bank, the same shall be filled up to its original amount within one year after such loss shall have been incurred. Any violation of the provisions of this section shall work a forfeiture of the charter of the offending bank.

Sec. 6. No bank shall be removed from the town or city wherein it is located by its charter. Nor shall any bank establish any branch, office, or agency thereof, for discount, in any other place than that in which such bank is located, unless by permission of the General Assembly. If any bank shall violate the provisions of this section, its charter shall be forfeited.

Sec. 7. No person shall be a director of any bank, unless he be a stock-holder therein, and a citizen of and resident in this State; unless in cases

where it is otherwise specially provided for.

Sec. 8. No person shall, after thirty days from the rising of this General Assembly, exercise or perform the duties of president, director, or cashier of any bank in this State, unless he shall have been sworn or affirmed before a competent magistrate faithfully to discharge the duties of said office according to law, and in his said capacity to abide by and support the laws regulating the interest of money. And in case any person

shall after said time exercise either of said offices without being sworn or affirmed as aforesaid, the person so offending shall forfeit and pay the sum of one thousand dollars, to be recovered by an action of debt, in the name

of the General Treasurer, before any court proper to try the same.

Src. 9. The ninth, tenth, and eleventh sections, and the thirteenth section as far as the proviso, of the act entitled "An act to regulate process against banks, and for other purposes therein mentioned," are hereby repealed; and from and after the passage hereof, all debts due to or from any bank, by bond, bill, note, or otherwise, shall be recoverable in the same manner as are debts due to or from individuals within this State, except as is hereinafter provided, and not otherwise: Provided, nevertheless, That every bank shall continue to have the remedy provided in said ninth section for the recovery of all debts contracted therewith, or actually owing to the same before the passage hereof, and all renewals thereof in the same manner and to the same effect as if this act had not been passed: Provided further, That nothing in this section contained shall be construed to affect any other part of the act aforesaid, the aforesaid sections of which are hereby repealed: And provided also, That nothing in this section contained shall be construed to impair any lien which any bank may have upon the stock of any stockholder thereof for debts or liabilities to such bank, or any right to sell such stock, contained in the charter of said bank or otherwise granted by law.

Sec. 10. If any bank in this State, or any officer of such bank, or other person in behalf thereof, shall, directly or indirectly, after ten days from and after the passage of this act, knowingly demand or receive from the maker, endorser, or holder of any promissory note, bill of exchange, or obligation of any description for the payment of money at a future day, upon the discount thereof by or on account of such bank, any greater interest or discount, in any manner, or under any form or pretence whatever, than at the rate of six per cent. per annum, the charter of such bank shall be forfeited, and the officer or other person knowingly demanding or receiving in behalf of such bank such excessive interest or discount shall forfeit and pay for each offence the sum of five hundred dollars to and for the use of the State, to be recovered by action of debt, in the name of the General Treasurer, before any court proper to try the same: Provided however, That it shall not be construed to be any violation hereof, to demand or receive interest or discount for periods less than one year, at the rate of six per cent. for three hundred and sixty days: And provided further, That any bank may require and receive, besides the interest or discount limited herein, a rate of exchange on drafts, bills of exchange, or promissory notes, payable at other places than the town or city wherein the bank discounting the same shall be located, not exceeding in the whole, upon each security, the following, viz:

One-quarter of one per cent. on any place in this State.

One-quarter of one per cent. on any place in the States of Massachusetts and Connecticut, and on the city of New York.

Three-eighths of one per cent. on the city of Philadelphia.

One-half of one per cent. on any place within the States of Maine, New Hampshire, Vermont, New York (other than the city of New York,) New Jersey, Pennsylvania (other than the city of Philadelphia,) Delaware and Maryland, or within the District of Columbia.

One per cent. on any place within the State of Virginia.

One and one-half per cent. on any place within the States of North Carolina, South Carolina, Georgia, and Ohio.

Two per cent. on any other place within the United States:

Provided, That nothing in this section contained shall be construed to apply to the rates of exchange on places without the limits of the United States.

Sec. 11. There shall be annually chosen by the General Assembly, a the May session thereof, three bank commissioners, who shall be duly commissioned, and whose duty it shall be to visit and examine, at their discretion, any of the banks in this State, to inquire whether they have been and are managed and conducted according to law; to inquire what abuses, i any, of the chartered privileges of such banks, require the correction of the General Assembly; and generally, in the exercise of the visitoria power of the General Assembly, with which they are hereby clothed, to ascertain the state and condition of the banks.

Sec. 12. A majority of the bank commissioners are hereby authorized to proceed in the discharge of the duties of their appointment, with the same powers as if all were present. Each of them, before entering upon the duties of his office, shall be sworn or affirmed before some competent magistrate, faithfully and impartially to perform the same according to law.

SEC. 13. The first section of the act entitled "An act to regulate proces against banks, and for other purposes therein mentioned," and also the first and only section of the act entitled "An act for altering the time of making the annual reports of the state of the banks," are hereby repealed, so far at they relate to the day when the returns of the banks shall be made, and so far, also, as they require such returns to be made to the General Assembly Hereafter, such returns as are required in and by the first section of the act first mentioned, shall be made to the bank commissioners, as often as they shall think expedient, once at least in every year, at such time or times and setting forth the condition of the several banks on such previous day or days, as the bank commissioners may, in writing, designate. If the president or eashier of any bank shall neglect or refuse, for the space of thirty days, to furnish the banks commissioners with such return as may be required by them, in writing, in conformity herewith, the charter of such bank shall be forfeited.

Sec. 14. The bank commissioners shall have power, for the purpose specified in this act, to examine, on oath, at such times as they may deen proper, the president, directors, eashier, and other officers, agents, and ser vants of any bank, and such other persons as they may deem necessary; to examine the books and papers of such bank, except the private accounts of individuals in such books; to send for persons and papers; to compel the attendance of witnesses, and the production of books and papers by writs of summons or attachments; and to commit for contempt of their process, of for a refusal to answer such interrogatories as may be put by them in the performance of their duties.

SEC. 15. The bank commissioners shall make report of their proceedings to the General Assembly, at the May session, in each year, and oftener i required. Their annual report shall be accompanied by a tabular state ment of the returns of the banks, made to them as before provided.

SEC. 16. If any person, upon being summoned to appear before the bank commissioners in the prosecution of their duty, shall neglect or refuse to attend, or, attending, shall refuse to give testimony as required, or shall neglect or refuse to produce any books or papers in his possession, which h

may have been required to exhibit, such person so offending, besides incurring the peril of commitment for contempt, shall forfeit and pay for each offence the sum of five hundred dollars, to and for the use of the States, to be recovered by action of debt, in the name of the General Treasurer, before

any court proper to try the same.

Sec. 17. The supreme judicial court, in term time, or any two justices thereof, in vacation, are hereby authorized and directed, upon complaint made to them, in writing, by any two of the bank commissioners, setting forth that, in their opinion, any bank in this State has forfeited its charter at law, or is so managing its concerns that the public are in danger of being defrauded thereby, forthwith to issue a citation to such bank, directed to, and to be served upon, the president, directors, and cashier thereof, by leaving a copy with each of them, or at their several last and usual places of abode, commanding such president, directors, and cashier personally to appear before said court, if in term time, or before any two of the justices thereof, if in vacation, on a day and at a place to be mentioned in the citation, then and there, under oath or affirmation, to show cause, if any they have, why a writ of injunction should not issue, enjoining such bank from further exercising the powers and franchises conferred by its And if, upon the examination of the president, directors, or cashier, and of such other witnesses and evidence as may be produced by the complainants and defendants, the court, in term time, or two justices thereof, in vacation, shall be of opinion that the charter of such bank is forfeited at law, or that such bank is so managed as that the public are in danger of being defrauded thereby, they are hereby authorized and required to issue an injunction to the president, directors, cashier, and other officers of such bank, enjoining them from proceeding further in transacting the business thereof, and to appoint some discreet and disinterested person or persons to be receiver or receivers of all the evidences of debt, goods, effects, and property of every description belonging to such bank; which receiver or receivers are hereby empowered and required to take the same into his or their possession, and collecting the debts and disposing of the property, to pay out of the proceeds thereof, if the same shall be sufficient, first reserving to himself or themselves a reasonable compensation for his or their services, the debts of the corporation, or ratably if there shall not be sufficient to pay the whole. In case there shall be any surplus after paying such receiver or receivers for his or their services, and afterpaying the debts of the corporation, with incidental expenses, such receiver or receivers shall distribute the same in due preportion among the stockholders of such bank. Such receiver or receivers shall be clothed with all the powers and rights in respect to the collection of debts due to such bank, which the corporation possessed in virtue of its charter or otherwise, before such injunction issued; and may be removed by the supreme judicial court, and others appointed in his or their stead. And the supreme judicial court shall have the same power and authority over such receiver or receivers. their acts, proceedings, and accounts, as is exercised by courts of equity in like cases. And the said court, at any term thereof subsequent to the issuing of said injunction, shall, upon a hearing of all the parties upon said complaint, if the court see cause, declare the charter of said bank null and And it shall be the duty of the said court to make return of their proceedings in the premises to the General Assembly.

SEC. 18. If the president, directors, cashier, agents, or servants of any

bank which shall be enjoined as before mentioned, or any other person upon being required thereto, shall neglect or refuse to deliver to the receiver or receivers of such bank, who may be appointed by virtue of this act, such evidences of debt, goods, effects, and property of every description, and evidences of and titles to property belonging to such bank, as may be in their possession or under their control, each person so offending shall, upon indictment for and conviction of such offence, before any cour of competent jurisdiction, be sentenced to pay a fine to, and for the use of the State, not exceeding ten thousand dollars, or to be imprisoned not exceeding three years, or to be both fined and imprisoned within the limit last aforesaid, at the discretion of the court.

NOTES.

In the above digest, prepared from the materials forwarded by the Comptroller, the following items have been onbraced under the head of specie and specie funds: "cash on hand, checks, &c.;" "specie on hand and specie funds, and fund in New York;" "cash forwarded." It is to be regretted that there is so much vagueness in stating an account of so much importance. Not one bank in the State appears to have given a statement of the exact amount of specie in its vaults.

United to the

G No. 1-BANKS OF NEW YORK.

Annual report of the Bank Commissioners.

ALBANY, January 23, 1836.

SIR: We have the honor to enclose our annual report, and are, very respectfully,

Your obedient servants,

C. STEBBINS,

GEO. R. DAVIS,

LEWIS EATON,

Bank Commissioners.

The Hon. Charles Humphrey, Speaker of the Assembly.

To the honorable the Legislature of the State of New York:

The Bank Commissioners, pursuant to law, respectfully submit the following report:

Annexed is a statement showing the condition of each of the banks subject to our supervision on the 1st instant. Their number is seventy-seven, and the following statement exhibits their aggregate liabilities to the public, and their resources to meet them.

Compared with their condition last year, it will be seen that the circulation and deposites have increased very much, and that they have therefore been enabled to extend their accommodations to the community, and have increased their discounts near seven millions of dollars.

The apparent circulation is now - \$18,955,000 Deduct bank notes on hand 8,186,000	
Leaves the actual circulation 14,464,000 Deduct bank notes on hand 5,745,000	\$10,769 000
Actual circulation	8,719,000
Increase of circulation this year The deposites now amount to Last year they were The deposites now amount to 1	2,050,000
Increase this year The capital and profits on hand have increased about	5,776,000 1,150,000
The canal fund and other loans have decreased 1,061,000 The balance of bank credits has decreased - 1,159,000	8,976,000 2,220,000
Leaving an increase of means this year of	6,756,000

The character both of circulation and deposites is too fluctuating to authorize discounts upon them to their full amount, and probably the extension of discounts is about as great as would be prudent, and the amount is about as large as the banks could make it and keep within the limits of the law.

More than half the increase of deposites is occasioned by the accumulation of Government deposites in the city of New York, which are less fluctuating, and therefore more available, than ordinary individual balances.

Although the business of the banks during the last year has been large beyond example in this State, yet their means have been extensive, business has been active and prosperous, and we believe them all to be in a

sound, healthy, and safe condition.

The demand for money occasioned by the late calamitous destruction of property in the city of New York; the increasing probability that the commercial interests of the country may be subjected to embarrassments growing out of our foreign relations; the strong probability that in any event a large portion of the Government deposites may be drawn from New York, to be expended elsewhere in the country; and the uncertainty, as yet, attending the manner in which the Branch Bank in New York is to be wound up, are all considerations, we think, which should inspire caution on the part of the banks, and induce them to prepare for a different state of the money market from that with which they have been favored the last few years, and especially the last.

Considering it desirable to be enabled to present a complete statement of the condition of all the banks of the State on the 1st instant, we previously addressed a circular to those institutions not subject to our supervision,

requesting a statement of their condition on that day.

All of them have very cheerfully complied with the request, and furnished their statements, except the Bank of Rochester. Annexed will be found

a table showing their condition individually, and aggregate statements of all the banks of the State, distinguishing between the safety fund banks and others, and between those located in the city of New York and elsewhere.

For the purpose of instituting a comparison between our banks and others, in respect to their means immediately available, (without resort to their discounted debt,) and those liabilities which they are subject to be called upon to discharge on demand, we have compiled the following table from a recent report of the Secretary of the Treasury, from our own reports, and from the last report of the banks in Massachusetts.

	- [Doc.	No.	65.]

(In the

LIABILITIES AND MEANS OF BANKS.

A comparison with all the deposite banks in the Union is supposed to be a very fair one, as they have been selected probably from among the best

and soundest institutions in the country.

Their means, and those of our country banks, it will be seen, amount to about 43 per cent. of their liabilities; those of the United States Bank, and the New York city banks, to a fraction more than 50 per cent.; those of all the banks of this State to over 46 per cent.; and those of the banks in Massachusetts to about 28 per cent.

The bank fund now amounts to upwards of \$530,000. A surplus of revenue arising from it up to the 1st of January, inclusive, amounting, as we estimate it, to about two and one-third per cent. upon the amount previously paid in, is now in the treasury, and we understand will be divided

in a short time among the banks entitled to it.

We are not aware that there has been during the last year any complaint, or any just cause of complaint, of those practices which were the subject of investigation by the last Legislature, and have no reason to believe that

they have been or will be again resorted to.

The measures adopted at the last session of the Legislature for the suppression of the small bank notes, have, so far as they have yet gone into operation, occasioned as little inconvenience as was to have been expected. The effects of the change were not sensibly felt until about the 1st of September, and since that time a large amount of specie has been put into circulation, which will be very much increased after the issues of the three dollar notes shall have ceased. As yet, the banks in the interior have found so serious difficulty in obtaining the requisite supply of specie from the cities, and most, if not all of them, have been obliged to resort there for it.

It is believed that, in general, the law has been very fairly carried into operation, and with much less difficulty in consequence of the co-operation of some of the adjoining States, which have adopted the same policy. Our Canadian neighbors, however, circulate a very large amount of small bank notes, which are taken as freely on the adjoining frontier of this State, as our own notes or specie. In a considerable portion of St. Lawrence county, where the intercourse of the inhabitants is chiefly with Canada, the law is entirely disregarded. It is more or less so in the counties bordering upon Vermont, in the extreme western counties, and in the city of New York. It will be found impossible, we apprehend, to enforce the law effectually, so long as the small notes are issued by the banks of the adjoining States.

There are but few ones and twos now circulating in the interior of the State, and the amount circulating in the other districts alluded to bears but

a small proportion to the amount withdrawn by our banks.

Notwithstanding the discussion which this measure received in the last Legislature, and in the public prints, a large portion of the community seem not to have apprehended all the reasons for its adoption, and to have regarded it rather as a precautionary measure to protect bill-holders against losses, than as one intended to effect more general purposes by enlarging the metallic basis, and thereby adding strength and stability to the entire currency of the country. Feeling no danger themselves, but possessing entire confidence in the ability of the banks, and finding some more inconvenience in the use of silver than small notes, when the effects of the law were first felt, they, to a considerable extent, regarded it with disfavor. Now, since the small silver coins have got into circulation, and the trading community have become accustomed to the change, the law, it is believed, meets

the public approbation much more generally, and to the banks, so far as we

know, is quite satisfactory.

The one and two dollar notes are already (mostly) out of circulation. The amount of bank notes in circulation, instead of being diminished by their suppression, it has been seen has increased more than two millions. This is undoubtedly owing to the abundance of money, the activity of business, and other causes unconnected with the measure alluded to.

One of the anticipated effects of the measure was the enlargement of the stock of specie in the country banks, and this begins already to be apparent. The increase, since the 1st of January last, is \$148,000, and a considerable addition to the stock now possessed will be required to meet the demand to be occasioned by the withdrawai of the three dollar notes after the 1st of March.

It is hoped that a much larger supply of the small gold coins may be furnished by the mint in season to meet that demand. A very considerable amount of quarter-eagles has been put into circulation within the last two years, of which but very few are now to be seen either in circulation or in the banks. They must be kept in small amounts by individuals into whose hands they have fallen, and, until the coinage becomes large enough to make them plentiful, probably cannot be expected to circulate freely.

The propriety of increasing the banking capital of the State, always a subject of great delicacy and importance, is rendered unusually so at this time by the unprecedented demand upon the Legislature from all parts of the State, indicating, as it would seem, a strong current of popular opinion

m its favor.

The causes which have operated to produce the conviction that a very large increase of legitimate banking business calls for this enormous addition to our bank capital, are truly and forcibly set forth in the Governor's message, and they are such as are well calculated to escape the notice of those whose opportunities of observation are at all limited. An unusual press upon the banks for discounts by persons engaged in trade, while money at the same time is plentiful, is naturally attributed to a corresponding increase of their business, without suggesting the inquiry whether other causes may not have contributed to withdraw from trade some of the capital which it had usually employed.

The business operations of the last year have been of the most extraordinary character, both in amount and variety. Foreign exchange being in our favor, a large amount of specie has come in, the United States Bank has extended its loans many millions, the Government deposites have accumulated rapidly, so that money has been plentiful, and the banks have been enabled without embarrassment to sustain a line of discounts exceeding that of any former year. Notwithstanding the abundance of money produced by these circumstances, the demand for it has scarcely ever been greater.

Immense investments have been made in stocks, in western lands, in city and village lots in almost every part of the State, and in real estate of

every description.

These investments, being esteemed more productive than capital at interest, have absorbed very large sums which heretofore have been, or otherwise would have been, in various ways, brought into use in aid of the mercantile interest, or the different branches of productive industry. cultural productions, which, for several years, have borne liberal prices, have advanced still farther during the last season, and to an extent difficult to be accounted for by any known increase of demand or deficiency of

crops.

A diminished production, in consequence of emigration, an increased demand for consumption upon works of internal improvement and in the manufacturing establishments, may have had some influence upon their prices; and it would be gratifying to feel assured, beyond all question; that they have not been influenced by a redundant currency. It is natural that the price of lands should advance as the productions of agriculture appreciate in value; and quite as natural that, when on the advance, excitement should operate to speed its velocity towards a point of reaction. Looking at the immense operations to which we have alluded, altogether unprecedented both in variety and amount, it is difficult to resist the impression that much has been the result of excitement. Excitement upon such subjects is difficult to be avoided, even by the more prudent and calculating part of the community. He who stands by and witnesses the profits realized by a single operation, equalling perhaps the accumulations of his whole life of industry and perseverance, and witnesses such operations not occasionally, only, but as familiar every day occurrences, must possess an unusual indifference to gain, or an exceedingly well balanced mind, not to be affected by the mania for speculation.

Operations of this kind, particularly in city and village lots, to be occupied, perhaps, by the next generation, and the value of which, of course, is entirely imaginary, have been so common of late, as to have engaged

much of the public attention, and become matters of notoriety.

The existence of an adventurous spirit of speculation is injurious to the community at large, as unsettling the relative value of property, inducing improvident investments of capital which might be otherwise usefully employed in the pursuits of industry, but more especially injurious in its influence.

ence upon the industrious habits of business men.

The minds of the young, particularly, who are just entering upon business, are perverted by this sudden, though hazardous, means of obtaining wealth from the more sure and steady pursuits of industry and economy, which administer so largely to the comfort, quiet, and order of society. Rapidity in the accumulation of wealth, (however desired by all,) almost invariably leads to extravagance in its expenditure, with the attendant and contagious evil of its example.

The banks, it is believed, have not been the voluntary instruments of encouraging the excitement for speculation; but yet it cannot be doubted that much actual capital has been withdrawn from ordinary business to carry on these speculations, and its place supplied by credits at the banks,

of an actual or supposed business character.

It surely cannot be a cause of complaint, that individuals possessing capital should invest it in Government lauds at the west, or in lands or lots within the State, or elsewhere, for the purpose of realizing the best profits they can; indeed, we may safely calculate upon speedy and rich returns from the capital invested in the productive regions of the west. But if an excited spirit of speculation is abroad, and requires to be fed with an extravagant increase of banks, all will agree that if it were desirable to sustain or encourage its enterprises, this is not the appropriate means of effecting the object. By connecting the currency with the success of such enterprises, we should not only give fresh impulse to the excitement, but expose the whole community to the disastrous consequences of a revulsion.

On the other hand, to whatever extent capital formerly invested upon interest, and directly or indirectly employed in trade, may have been withdrawn in consequence of the prospect of a more productive investment elsewhere, (and in reference to the inquiry under consideration, it is quite immaterial whether such investments may be judicious or not,) a new credit would seem to be required, in order to sustain the interests of trade; and, to that extent, a recourse to the banks appears natural and proper; for although the creation of banks creates no new capital, yet banks do furnish to the community, beyond the amount of their capital, a credit which answers the purposes of capital to men in business.

They also distribute capital in their neighborhoods, drawn by means of their stock from other places and other investments, and locally, therefore,

produce an actual increase of capital.

In so far, therefore, as the mercantile or manufacturing interests may demand an enlargement of the banking capital to supply the place of capital recently withdrawn from their use, and permanently invested elsewhere, we do not perceive why the application is not a fair one, unless it be conceded that we had too much before.

So, also, in regard to the increase required to meet the constantly growing

demands of business.

Such considerations, however, from their nature, approximate but little towards any definite rule of action upon the subject. In this country, every thing in the way of business progresses with such astouishing rapidity, in consequence of its new and immense resources, which are daily developing, that no human mind can undertake to measure the amount of currency which may be sufficient for our wants, and yet not sufficient to derange the value of property. Banking, with us, is an experiment, in a great measure unknown to the rest of the world; and we should, therefore, proceed with caution, as the lights of experience may guide us.

The question is, how far is it safe to extend this system of credit?

Upon any rational calculation which we are capable of making, we cannot believe that the amount of additional bank capital actually required, and which might be safely granted, bears any respectable proportion to the amount petitioned for. But yet, we do believe that some additional bank capital is required, and may safely be granted.

In our estimates upon this subject, it should be borne in mind, that, besides the direct increase of banking capital which has been made within the last few years, there has also been an indirect increase, by the accumulation of canal fund moneys in the hands of the banks, by the Government depos-

ites, &c.

The possession of these funds has enlarged the ability of the banks to discount as upon nearly so much additional capital; and it is only by the use of them now, that the banks are enabled to sustain the large amount of their discounts.

The following table will show the progressive increase of capital, other means and business of the safety fund banks, for the last four years; by which it appears that their loans to the community during that period have almost doubled.

Loans and discounts	\$38,665,000	\$43,044,000	\$51,515,000	\$58,736,000	\$68,733,000
	32,824,000	35,568,000	46,496,000	52,853,000	59,663,000

We have heretofore expressed the opinion that, in the distribution of bank capital, the public interest would be better promoted, in most instances by increasing the capitals of existing banks, than by the creation of new ones.

The reasons for that opinion are given in our report of 1834, and we think they apply with peculiar force at this time. It is capital that is now wanted, not currency. The circulation of the banks is now much larger than usual, which shows that money is plentiful, although capital may be wanted, and certainly is in demand.

It can be furnished to the community with a less increase of circulation

by enlarging the present, than by establishing more banks.

In the city of New York, where we think more capital is required, we should esteem it desirable to enlarge the capitals of the smallest class of banks, as well as to raise some of the others up to the highest class.

In the country, there are some few instances in which new banks would better accommodate the public, (without being particularly objectionable in other respects,) than an increase of existing capitals; although, generally, we

should think otherwise.

The \$100,000 capitals we have always considered too small, and within a suitable time should deem it desirable to have them increased, as well for the purpose of affording more security for their liabilities, as more accommoda-

tion to the public.

If any new bank capital shall be authorized, it will be important to have it taken by individuals who possess actual capital to invest, without raising it upon the credit of the stock itself, as we have found has sometimes been done. The law now requires the capital to be actually paid in, and there can be no hardship in requiring the money to be raised without pledging the stock upon which it is paid.

This may be accomplished by a provision prohibiting the hypothecation of the stock for any purpose whatever, say for one year after the original issue of the certificate; and, in our opinion, it would be a wise and salutary

provision.

We also suggested, in our report of last year, the propriety of prohibiting all the banks from receiving hypothecations of the stocks of other banks; and subsequent observation and reflection have confirmed the impression then entertained, that such a provision would be salutary in its influence, without being justly considered as oppressive, either upon the banks or the holders of such stocks.

Respectfully submitted.

C. STEBBINS,
GEO. R. DAVIS,
LEWIS EATON,
Bank Commissioners.

ALBANY, January 23, 1836.

G No. 2-BANKS OF NEW YORK-Continued.

Report of the Comptroller, in answer to a resolution of the Assembly, giring a statement of the incorporated banking capital in 1800, 1805, 1810, 1815, 1820, 1825, 1830, and 1835.

Comptroller's Office, Albany, January 25, 1836.

To the Assembly:

The Comptroller, in obedience to a resolution of the Assembly of the 16th instant, requesting him to furnish a statement "which will exhibit for each of the years 1800, 1805, 1810, 1815, 1820, 1825, 1830, and 1835, the amount of incorporated bank capital within the State; also, a statement of all banking incorporations which have become insolvent from the 1st of January, 1800, to January, 1835, their names, amount of capital, when incorporated, and when they became insolvent;" respectfully submits the following report:

The amount of incorporated banking capital has been ascertained by examining the session laws from the first organization of the State Government to the present time. But the actual capital employed by the several incorporated banks in the State, at any given period previous to the adoption of the safety-fund system, (1829,) cannot be ascertained with certainty. The bank charters granted previous to 1826 authorized the commencement of banking operations when a certain per centage on the nominal capital, varying from 12 to 50 per cent., should be actually paid in. The directors had authority to call in additional capital, from time to time, until they reached the limit prescribed in the charter. Returns from the banks, under the old system, of the amount of capital actually employed by each, were made only in a few cases; and hence it is not practicable to ascertain, with entire accuracy, the amount of banking capital employed at the various periods referred to in the resolution of the Assembly.

A list of the banks chartered in this State from 1791 to 1835, giving the incorporated capital in each case, has been prepared, and is annexed to this report. Where banks have failed at any time intermediate between the periods at which the capital is required to be given by the resolution, the amount of chartered capital is deducted at the close of the five years.

The safety-fund system, adopted in 1829, by compelling the banks which were rechartered under it to have the whole amount of the chartered capital paid in, has exhibited the difference between the incorporated and the actual capital of many of the old banks. At the close of 1830, after deducting the amount of the diminution of bank capital, by failures and other causes, there remained of incorporated capital the sum of \$26,185,000.

The amount of capital actually employed at that time, as given in the report of the bank com-

- \$21,323,460

missioners, for 1831, was - - - Add for six banks chartered in 1830, and not organized or included in the report,

2,550,000

23,873,460

\$2,311,540

This shows a difference between the incorporated and the actual capital, of \$2,311,540; which is accounted for by the fact that many of the banks, under the old system, had not called in the whole amount of the capital which they were authorized to use by their charters. Subsequent to this period, there were reductions, probably of the same character, amounting to more than half a million of dollars.

· With these explanations, the following summary of the bank capital in this State, at the several periods referred to in the resolution, is submitted,

viz:

								# 2 100 000
Bank	capital	in 1800	-	-	•			\$3,420,000
"	îc	in 1805	-		• -	-	7.	5,430,000
44		in 1810	-		-	-	-	7,430,000
- 16	16	in 1815	-	· -	1 -		-	18,215,000
	££	in 1820	-	-	-	1	-	21,105,000
K	- 16	in 1825					,	25,105,000
K	α.	in 1830	-	-	-	-	-	23,873,460
66	£¢.	in 1835			-	-		31,483,460
			,					

In relation to the second branch of the resolution, relative to the banking incorporations which have become insolvent since 1800, the public offices do not furnish all the information necessary to answer the resolution. Such information as could be obtained, is given in the table below, viz:

Names of insolvent banks.		Amount of in- corporated eapital.	When incorporated.	When insolvent.
Bank of Columbia Bank of Hudson Middle District Bank *Bank of Niagara Bank of Plattsburg Washington and Warren Bank Franklin Bank Greene County Bank, (Aqueduc Association)	ct	\$160,000 300,000 500,000 400,000 300,000 400,000 500,000	1793 1808 1811 1816 1817 1817 1818	1829 1820 1829 1819 1825 1825 1830
Association	11	2,650,000	, 1010	1021

The annexed statement, marked A, contains a list of the names of all the banks chartered in this State from 1791 to 1835, with the amount of incorporated capital in each case.

All which is respectfully submitted.

A. C. FLAGG.

^{*} Revived in 1825, and failed again the same year.

LIST OF BANKS.

(A)

In 1782, an act was passed by the Legislature of this State, in compliance with a request contained in an ordinance of the Congress of the United States, incorporating the "Bank of North America," within this State, and prohibiting the establishment of any other bank, public or private, "during the war with Great Britain."

The following is a list of the banks chartered since, and the capital of each, as given in the charter, viz:

Besides the above, the Easton Bank made in March an extra dividend of 12 per cent.; and the Merchants and Manufacturers' Bank of Pittsburg makes returns of a dividend of 4 per cent. in November, 1834. No returns of dividends have been made by the Chester County Bank, the Columbia Bridge Company, or the Harrisburg Bank. The Bank of Lewistown had, in November, 1835, been only one month in operation.

In 1835–'36, the Legislature of Pennsylvania reincorporated the Bank of Middletown, the Bank of Gettysburg, and the Bank of Northumberland; gave a charter to the Bank of the United States with a capital of 35,000,000 dollars; increased the capitals of four old banks in the aggregate amount of 4,150,000 dollars, and incorporated four new banks with an aggregate capital of 1,600,000 dollars. For particulars see B B, and C C.

NOTE.

The ten banks in the first division of this table, have made returns to the Treasury Department. A letter was addressed to each of the four banks named in the last division of the table, requesting a statement of their affairs, but no reply was received to any of these letters. From another source, information has been obtained of the amount of capital paid in, of each of these banks, which has been made the ground of an estimate of their specie, circulation, and other resources and liabilities.

Note 3.—The following banks hold, of their own stocks, the amounts hereunto annexed:

Commercial and Farmers' Bank		-	-	-	-	\$82,926
Bank of Baltimore -	-	-	-	-	••	1,800
Farmers and Merchants' Bank	-	-	-	-	-	36,914
Franklin Bank	-	-	-	-	-	17,797
Union Bank	-	-	-	-	-	521,084

In all, \$660,521; which, deducted from the gross amount stated in the table, would make the nett capital of the Baltimore banks, \$5,696,740.

The Union Bank has \$500,000 in Tennessee bonds; \$500,000 in the 6 per cent. loan of the Baltimore and Ohio Railroad Company; \$140,580 in the Cumberland road; \$21,340 in the Boonsborough road; \$750 in the American Insurance Company.

The stocks held by the other Baltimore banks consist almost exclusively

of Cumberland and Boonsborough road stocks.

NOTES.

In the summary A A, the accounts of the Farmers and Planters' Bank are not included, inasmuch as it is one of the new banks, and its accounts belong rather to the epoch of 1836–37, than to that of 1835–36. On the 15th of December, it had been but seventy-three days in operation. In a letter of that date, the cashier says, "the amount of capital subscribed is \$592,325, which is being paid in by regular instalments. The books are still open for subscriptions, and it is expected that the stock (\$2,000,000) will be filled up when the pressure on the money market subsides."

The Legislature of Maryland, at the December session of 1835, incorporated eleven new banks, with an aggregate capital of \$16,100,000.—See C.C.

NOTES.

The amount which stands against the Farmers' Bank of Alexandria, unter the head of "deposites," has been returned by that bank as "deposites and discounts."

Several of the banks have not stated explicitly what amount of their own stock they hold. The Bank of the Metropolis did, during part of the year, hold upwards of 200,000 dollars' worth of its own stock. But, on he 1st of November, 1836, this amount was reduced to 26,000 dollars, and may now be further reduced.

Note 5. The Bank of the Valley of Virginia, at Winchester, has offices at Charleston, Romney, and Leesburg. The Merchants and Mechanics' Bank, at Wheeling, has an office at Morgantown; and the Northwestern Bank at

Wheeling an office at Wellsburg.

Note 6. The Bank of Virginia made a dividend of five per cent. July 1, 1835, and another of four per cent. January 1, 1836. The Merchants and Mechanics' Bank at Wheeling made a dividend of three per cent. in July, 1835, and another of five per cent. in January, 1836. The other banks have made no statement to the Legislature of the amount of dividends declared.

Note 7. The active debt of the branches of the United States Bank at Richmond and Norfolk has been transferred to the Bank of Virginia and

the Farmers' Bank of Virginia, in about equal proportions.

Note S. A joint committee of the Senate and House of Delegates, appointed to examine the condition of the Bank of Virginia, and of the Earm-

ers' Bank of Virginia: made report:

That the total outstanding debt due to the bank [of Virginia] for notes discounted amounts to \$7,106,934 51; specie, \$659,248 28; and the debt due from other banks, which may be considered as specie, is \$1,473,270 61; and added to the specie on hand, makes the available funds amount to \$2,132,518 89. The stocks of the James River Company, and of the James River and Kanawha Company, held by the bank, amount to \$140,000; and the real estate is estimated at \$320,237 58, making the aggregate of the means of the bank amount to \$9,699,690 98.

"The bank is indebted for notes in circulation \$3.781.041, and money due to other banks \$343,509 49; discounts \$11,179, and deposite money

\$2,323,961 49. Its immediate liabilities, therefore, amount to \$6,459,690 98,

and its total amount of debts to \$9,699,690 98.

"A contingent fund has been for some years forming out of the profits of the bank, over and above the dividends declared. This fund is in the nature of a sinking fund, and is intended to be applied to reimburse any losses which the bank may sustain, or which have already occurred. At this time, the fund belonging to the Bank of Virginia amounts to \$435,732 13; and the bad and doubtful debts to which the fund is applicable, are estimated to be \$375,528 64, which will leave a balance on hand, after the extinguishment of all bad debts, of \$60,203 49.

"In relation to the contingent fund of the Bank of Virginia, and of the Farmers' Bank of Virginia, the committee think it proper to remark, that it forms a part of the amount stated under the head of 'deposites,' on which the bank is expressly authorized to discount; and in regulating its power to issue notes by three-fold the amount of its capital, together with the amount of its deposites at any time on hand, the powers of the bank are

increased by its deposites.

"The contingent fund of the bank being held as deposites, instead of being at once applied to the liquidation of its bad debts, gives it the power to increase its issues to the amount of \$435,732. This could never have been the intention of its charter; for, if this power be granted, they may enlarge this fund to a million, and, by estimating it as deposites, increase their circulation in proportion, and virtually augment at pleasure the capital of the bank. It is not intended by the committee to insinuate that the contingent fund is now held as deposites, for the purpose of extending at this time the circulation of the bank, because it is evident that the terms of the charter confer this power without a resort to expedients; but it is designed to show what the effects may be, whenever it may become necessary in any bank to resort to such means.

"The same remarks are applicable to the Farmers' Bank, as it holds its contingent fund in the shape of deposites in the same way, to the amount

of \$271,347.

"The means of the Farmers' Bank are composed of its outstanding debt on notes discounted, amounting to \$4,773,604 33; specie, \$577,923 10; foreign 'notes, \$208,792 49; due from other banks, \$428,155 71; bank stock, \$23,715 50; and real estate, \$232,418 34; in all, \$6,244,609 47.

"Its liabilities are, for debts to stockholders for capital, \$2,000,000; for notes in circulation, \$2,712,937; and for its deposites, (the contingent fund being deducted,) the sum of \$1,260,325 28; making the liabilities of the bank amount to \$5,984,284 19.

"The bad and doubtful debt of the bank is rated at \$283,677 19; and its contingent fund on deposite being \$271,349 21, leaves a bad and doubt-

ful debt to be provided for, amounting to \$12,329 58.

"The committee cannot close this report without referring to the condition of the circulation of all the banks in relation to the specie or metallic

basis on which it is founded.

"Frequent expositions of the particular condition of these institutions present the best evidence the people can have of the condition of the currency, and may in some degree prevent over-issues of paper, and a depreciation consequent thereon. It is difficult to determine the exact proportions which should exist between the metal which it is requisite at any time to keep on deposite, to enable a bank to redeem its notes as they may

be presented for payment; much depends on the credit of the bank and the course of domestic trade, which enables it to circulate its notes at a distance from the spot where they are made payable. What the excess o issues over the coin or bullion on hand may safely be, cannot, therefore, be precisely stated. The estimate most usually made is as three to one. If we compare the circulation of the banks in Virginia to the metallic basis on which it should be founded, we shall find it to be as \$5 22 to \$1, or \$5 22 to one dollar in silver.

The Bank of Va. has in specie, \$659,248 28, in circulation, \$3,781,041 Farmers' Bank do. 577,923 10 do. 2,712,937 Bank of the Valley do. 175,445 78 do. 944,445 Northwestern Bank do. 62,799 00 do. 269,900

Specie - \$1,475,416 16 Paper \$7,708,323

"While your committee deem it their duty to present these views to the Legislature, it is proper to remark, that they consider the banks, whose condition they have been directed to examine, to be not only in a sound,

but in an improving condition."

Note 9. On the 1st of January, 1836, nearly one-half of the active debt of the office of the United States Bank at Richmond, viz. \$312,518 78, was transferred to the Bank of Virginia. For this sum this bank has given four notes payable in equal annual instalments of 1, 2, 3, and 4 years, and eight other notes for the semi-annual interest, at the rate of 5 per cent. per annum, both principal and interest to be paid at Philadelphia. The residue, viz. \$315,285 40, was transferred to the Farmers' Bank on the like conditions.

The active debt of the office of the United States Bank at Norfolk, amounting to \$120,502 35, has been transferred to the two banks on precisely the same terms and conditions. It is stated that the only motive with the Farmers' Bank and the Bank of Virginia for engaging in this operation was, the desire to relieve their enstomers from the pressure of paying off these debts immediately.

Name, place, and date.	Loans and discounts.	Real estaté.	Other, investments.
Bank of the State of North Carolina, Raleigh, November 21, 1835 Bank of Cape Fear, Wilmington, Nov. 2, 1835 Merchants' Bank, Newbern, November 28, 1835	\$2,331,534 800,195 309,512	\$24,368 77,116 6,220	\$3,981 111,238
'. Total of 3 banks and 4 branches -	3,441,241	107,704	115,219

NOTES.

The Bank of Cape Fear makes a return of specie funds of the amount of \$111,238, which have in this table been brought under the head of "other investments." In the summary, the aforementioned amount is placed

under the head of "specie funds."

In the report from this department of January 5, 1836, the old State Bank of North Carolina, and the Bank of Newbern, were included in the list of banks, and a statement given of their condition. They are omitted in the present list, because (although their charters do not expire till December 31, 1837,) they appear to have nearly wound up their affairs. The old State Bank of North Carolina has nominally in circulation about \$120,000; and the Bank of Newbern about \$60,000; but as these banks were established many years ago, it is probable that a large amount of their notes nominally in circulation has been lost or destroyed. The precise amount cannot be known till their affairs shall be finally closed. The new Bank of the State of North Carolina redeems the issues of both these banks, and there are ample theans to withdraw the whole amount of nominal issues.

The Bank of Albemarle, mentioned in the former report from this department, never went into operation. It has now no corporate existence.

The only banks at present in operation in North Carolina are the three given in the table. The Bank of the State of North Carolina was incorporated in 1833, with an authorized capital of \$1,500,000—\$900,000 for individual stockholders, and \$600,000 for the State. By the 20th August, 1836, the whole of this capital had been paid in. The Bank of Cape Fear, with an authorized capital of \$800,000, was rechartered in 1833. The Merchants' Bank of Newbern was incorporated in 1834, with an authorized capital of \$300,000.

NOTES.

The Bank of the State of North Carolina has power to establish branches and agencies at such places as the stockholders, in general meeting, may designate. The president and directors of the Bank of Cape Fear have power to establish branches and agencies at such places as they may deem proper. The Merchants' Bank has no power given to it by its

charter to establish branches and agencies.

The Bank of the State of North Carolina had, on the 1st of January last, branches at Newbern, Fayetteville, and Tarborough. The branch at Wilmington went into operation in February last, and the branch at Elizabeth City was commenced in November. It had in operation, on the 1st of January last, the following agencies, to wit: Charlotte, Morgantown, Leeksville, and Milton; and in May last an agency was established at Windsor. The branches of this bank issue notes payable at the branches, respectively. The agencies make discounts and purchase bills of exchange with the funds of the principal bank: they are mere offices of the principal bank, and keep accounts with no other bank.

The Bank of Cape Fear had in operation on the 1st of January last, a branch at Fayetteville, and agencies at Salem and Hillsborough. Since that time it has established a branch at Washington. This bank makes all its notes payable at the principal bank in Wilmington: there is no difference between its branches and agencies, except in name and style: they are all

mere offices of the principal bank.

NOTES.

Since the date of the report from the Commercial Bank at Columbia, the whole amount of its chartered capital, viz. \$800,000, has been paid in. The Bank of the State of South Carolina has branches at Columbia and Camden, and agencies at Hamburgh and Georgetown.

The Planters and Mechanics' Bank has agencies at Cheraw and Cam-

den, for the discount of inland bills of exchange only.

The Bank of the State of South Carolina is owned by the State. In the amount of notes issued by this bank, are notes of a less denomination than one dollar, of the aggregate value of \$83,725.

In the statement of the loans and discounts of this bank, are included bills, notes, and bonds in suit, \$116,860 51; bonds secured by mortgages,

\$658,322 72; judgments, \$25,027~06.

Under the head of "other liabilities," in the statement of the accounts of this bank, are included the two following items: "To State Treasurer, for the sinking fund of the State of South Carolina, for redemption of 5 and 6 per cent. stock, and for the payment of interest thereon, \$461,360 25. To discount and interest received and transferred to sinking fund, \$135,000.

To the honorable the Speaker and members of the House of Representatives:

The President of the Bank of the State of South Carolina begs leave to report:

That the operations of the bank for the last year have been unusually successful; and he is enabled to carry to the credit of the sinking fund the sum of \$135,000, besides extinguishing the remnant of some old debts which have been lost, by carrying the amount to the account of profit and

NOTES.

loss, and leaving to the credit of the contingent account the sum of \$20,638 73, to meet the payments to the rail-road subscription, premium on stock, specie, &c. While it affords him great satisfaction to make such an exhibit, during a year of such severe trial and difficulty in the commercial world, and such an unusual disturbance in the money system of the whole world, it becomes a duty, not only to the State, but to himself, to say that a continuation, and more particularly any increase in these matters of diffi-culty, forbid the hope of the like success for another year. The late difficulties between the Bank of England and the American merchants have developed some important and startling facts, which are worthy of serious consideration, when we advert to the standing which is held by that great institution. It is declared that the specie of the world is not adequate to the greatly increased demand of the commercial world; and hence it has become the subject of barter and sale, to the great annoyance of the banking system. Added to the universal increase in the commerce of the world, arising from the peaceful state of Europe and America for the last thirty years, the rapid use and improvements of the latter have required and exhausted no small amount of the capital of England, and, consequently, their operations at present are somewhat contracted, and must remain so for a time. The truth of these facts has been greatly felt during the last year, and are at this moment operating in our community, and it will require all the aid of a good crop to afford relief to us and assistance to them.

So much specie has been drawn from England of late, that every effort must now be made by her to prevent a further drain; and interest has risen in every part of Europe, as far as we can obtain information. The great number of banks in the United States, and that number continually increasing, each requiring a certain amount of specie corresponding with their capital, has created, together with the universally high rate of exchange, (and the Government order in the sale of the public lands,) such a demand

for it here, as to induce the brokers to make it a subject of barter and exchange; and they have been, and now are, drawing daily from the banks all they can, to the great inconvenience of the community, inasmuch as it obliges the banks to restrict their operations. I think I am within bounds when I say that a million of specie more has been required in the operations of the banks of our city this year, than in any former year since that of 1825. Add to all this a spirit of speculation and over-trading, which pervades all parts of our country, and it will be seen that the utmost caution and circumspection are necessary in the conduct and management of the institution. With an enlightened and active board of directors, such as we now have, ever mindful that it is not only necessary to sustain the bank, but also the credit of the State, I think I can venture (with a confidence in the protection and support of that benignant Providence we have experienced for so many years) to promise such results as, under all circumstances, will be deemed satisfactory to an enlightened and liberal Legislature. All which is respectfully submitted.

C. J. COLCOCK, President.

The Bank of the State of South Carolina makes returns to the Legislature. The four other banks in the first division of the table, have made returns to the Treasury Department.

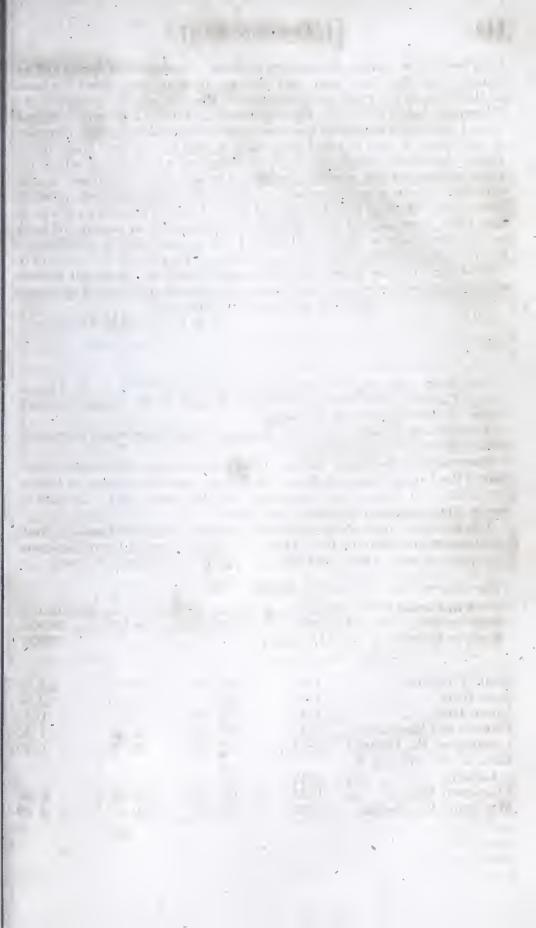

The State Bank, and the Union, though solicited, have made no returns.

Their affairs have been estimated.

The charter of the South Carolina Bank was renewed in December, 1830; that of the Union Bank, and that of the Planters and Mechanics', in December, 1832; and that of the State Bank, in December, 1834. In each instance, the extension is for twenty-one years.

The following table shows the dividends declared by the banks of South Carolina on the 30th of June, 1836, the original cost of their shares, and their price in July, 1836; and also the original date of their charters.

Names of banks.	Original charter.	Original cost per share.	Price of a share in July, 1834.

NOTES.

The small amount of the circulation of the Central Bank is owing to a seculiar provision in its charter, which restricts the issues "to the aggretate of specie and bills of other chartered banks of this State, and the bills of the Bank of the United States, in its vaults."

The Bank of the State of Georgia, at Savannah, has offices at Augusta, Milledgeville, Washington, Eatonton, Greensborough, Macon, and Athens.

The Bank of Darien is believed to have offices at Savannah, Milledgeille, and Macon; and the Marine and Fire Insurance Company, at Sarannah, an office at Macon.

NOTES.

The accounts of the first four banks are from returns to the Treasury

Department. Those of the Farmers' Bank have been estimated.

The Union Bank, the Central Bank, and the Bank of Pensacola, have made no distinct return of the amount of specie they have on hand, but have made one item of "specie and notes of other banks." In the above table, the sums thus returned by them have been placed in the column of "notes of other banks." In the summary A A, they have been brought under the head of "specie funds."

NOTE.

In January, 1836, the Legislature of Alabama incorporated the Planters and Merchants' Bank of Mobile, with a capital of \$5,000,000. This bank is believed to have commenced operations. The Legislature also passed acts to increase the capitals of the different branches of the State Bank in the amount of \$2,900,000. See B B and C C.

* The Bank of Orleans declined giving a statement of its affairs; and, to complete the table, it has been necessary to estimate the various liabilities and resources of this bank; as bearing about the same ratio to its capital as those of the other banks bear to their capital in the aggregate.

BANKS OF LOUISIANA—Continued.

NOTES.

For a statement of the amount of capital the Exchange and Banking Company is allowed to hold, and the amount paid in, see C C.

Another bank, called the Merchants' Bank, is expected to go into opera-

tion in New Orleans in the winter of 1836-'37.

In the amount of loans and discounts of the Consolidated Association,

are included \$982,583 stock loans.

The Commercial Bank has \$490,473 invested in water-works; the Gastight and Banking Company has \$400,803 invested in gas-works; and the Carrollton Rail-road and Banking Company has \$332,709 invested in a rail-road, and \$36,990 in an hotel. These amounts arc, in the table, brought into the column headed "real estate."

The Gas light and Banking Company owed the United States Bank \$2,500,000, on account of purchase from said bank. This amount has, in

the table, been placed under the head of "other liabilities."

The following branches of the banks of Louisiana were in operation in January, 1836, viz:

Capital. Louisiana State Bank branch at Martinsville - \$100,000 do. Alexandria 400,000 N. Orlcans Canal and Banking Co. do. 400,000 Ditto St. Francisville Ditto do. Donaldsonville 250,000 Ditto do. -Franklin -250,000 Mechanics and Traders' do. **Opelousas** 300,000 do.Vidalia 200,000 Ditto 200,000 The Bank of Louisiana do. Baton Rouge Ditto do. *1411.41 , 10 4 41 k 21 25 (4)

NOTES.

In the report from the Treasury Department of January 5th, 1836, the number of branches was given which each bank was allowed by its charter to establish. In the above table, the number is given of branches in actual operation, as well as could be ascertained.

Inasmuch as many of the branches act to a certain extent as independent banks, the above table does not show the whole extent of banking op-

erations in Louisiana.

01911

The Atchafalaya Rail-road and Banking Company appears to have two branches in partial operation; and the Gas-light Company, likewise, two or more branches in partial operation, at places the names of which are not given.

or gradies of the control of the section of the sec

Norg.-It will be observed, that the dates in Tables I. and II. are not the same, whence arises the difference in the statements of the amount of capital paid in, and in some other particulars. *In October, 1835, the Commercial Bank had no vaults of its own. In addition to its specie, at that time, it had \$90,000 in notes of other banks, and a balance due of \$250,000.

† Excluding the Government deposites, which are covered by exchange, as above stated.

‡ Excluding the amount on the United States Bank agency, then boxed for exportation.

S No. 3—TABLE III.—

		· ·	
Names of banks.		Date of charter.	When amended.
Union Bank of Louisiana Commercial Bank Mechanics and Traders' Bank New Orleans Gas-light and Banking Company Carrollton Rail-road and Banking Company Citizens' Bank of Louisiana Atchafalaya Rail-road and Banking Company Improvement and Banking Company Exchange and Parking Company		April 30, 1811 March 14, 1824 April 7, 1824 March 16, 1827 March 3, 1831 March 5, 1831 April 2, 1832 April 1, 1833 April 1, 1833 April 1, 1835	Jan. 13, 1832
Fifteen banks	-	-	-

NOTES.

One of the branches of the Exchange and Banking Company is to be at Plaquemine, and another at Natchitoches; the intended location of the third branch is unknown, as is also the location of the branches of the New Orleans Gas-light and Banking Company, and of the Atchafalaya Rail-road and Banking Company. For the location of the branches of the other banks, see S No. 1.

It has been observed, that, inasmuch as many of the branches of the banks of Louisiana act, to a certain extent, as independent banks, Table I. does not show the whole extent of their operations. In the statements rendered, the banks make their branches debtor for the amount of capital furnished them and on running account, and credit them on running account.

According to the returns made to the Treasury Department, the amount of capital paid in, of the branches believed to be actually in operation, is \$5,100,000. Supposing the liabilities and resources of the branches to be in about the same ratio to their capital as those of the parent banks are to theirs, the principal items would stand as follows:

theirs, the principal item	ns woul	d stand	as follo	ws:	11 1

Other liabilities	-	-	-	-	-	_	709,920
Capital -		· // -/ /,	-	-	-	~	5,100,000

This estimate is given as the best which circumstances will permit to offer. An article which has appeared in the public prints, and which is believed to be from a gentleman well acquainted with banking affairs in that quarter of the country, intimates that the parent banks in some of the southwestern States are very imperfectly acquainted with the condition of their branches.

If the estimate here offered be regarded as admissible, the total extent of banking operations in Louisiana is about as follows, *exclusive* of the operations of the agency of the United States Bank, some account of which will be found in S No. 2.

Number of banks in	operation	in Lo	uisiana	in Octol	per, 183	6	14

Com'l and Rail-road, Vicksburg, Dec. 7, 1835 - Planters' Bank, Natchez, Jan. 21, 1836 - Agricultural Bank, Natchez, July 19, 1836 - Commercial Bank, Rodney, Nov. 8, 1836 - Commercial Bank, Manchester, Nov. 28, 1836 -	\$2,165,786 10,322,283 5,518,431 566,292 552,185	-	\$7,000 137,572 33,450 7,689 11,000	\$1,459,978 5,033
Total of five banks and eight branches	19,124,977	- :	196,711	1,465,011

NOTES.

The Commercial and Rail-road Bank at Vicksburg, had, at the date of the above return, been in operation about ten months, "more than half of which time," says the cashier, "we had to transact business without having any of our own paper on hand."

The Agricultural Bank makes a return of "checks on banks maturing," \$383,744. This amount is inserted in the table under the head of "other

liabilities."

The Commercial Bank of Rodney is in Jefferson county. Subscription books were opened on the second Monday of March, 1836, for subscription to the capital stock; and on the third Monday thereafter, the whole number of shares thereof were subscribed for, and the first instalment paid, amounting to \$160,000. On the 28th of March the institution was organized by the election of the first board of directors, and it commenced business on the 5th of April. The charter expires on the 1st of January, 1861. The capital of the bank is limited to 800,000 dollars.

The Planters' Bank at Natchez has seven branches, viz: at Manchester, Vicksburg, Port Gibson, Woodville, Monticello, Jackson, and Columbus.

The Agricultural Bank has a branch at Pontitoc.

Letters addressed to the remaining banking companies in Mississippi have remained without reply, as have also letters addressed to the Governor, to the Secretary of State, and to the Treasurer of the State, soliciting information respecting the banks in Mississippi.

List of incorporated banking companies in the State of Mississippi.

Name.		Location.	Potential capital
Planters' Bank Agricultural Bank Commercial Bank Grand Gulf Rail-road and Banking Company West Feliciana Rail-road and Banking Company Commercial and Rail-road Bank Commercial Bank Princeton and Deer Creek Rail-road and Banking Company Aberdeen and Pontitoe Rail-road and Banking Company Commercial Bank Mississippi and Alabama Rail-road and Banking Company Eleven banking companies	- Gr - W - Vi - Ro	atchez - Do Do cand Gulf - codville - icksburg - odney - anchester - candon -	\$4,000,000 2,000,000 2,000,000 2,000,000 1,000,000 2,000,000 600,000 1,000,000 2,660,000 4,000,000

The foregoing list has been compiled from statements made in the public prints.

The Legislature reserves the right of subscribing certain funds to the capital of the Planters' Bank, whereby its capital may be increased to a much greater amount than \$4,000,000, the sum specified in the charter.

The Grand Gulf Rail-road and Banking Company has a branch at Gallatin; the Mississippi and Alabama Rail road and Banking Company has a branch at Paulding; the Commercial and Rail-road Bank of Vicksburg is to have a branch at Vernon. The charter of the Commercial Bank of Manchester requires it to have one branch.

9. The President of the Bank of Kentucky, in a report to the Legisla

ture, dated January 4, 1836, makes the following statements:

"As soen as circumstances would permit, after the requisite number of shares had been subscribed, an election of directors on the part of the State and stockholders for the principal hank took place, (the sum of \$300,000 having been paid, as required by the 46th section of charter,) and the bank went into operation on the 16th of April. With the design of making the institution as useful as possible to every part of the State, according to the intention of the Legislature in granting its charter, and also to insure the best profit to the stockholders, the parent bank located the full number of branches authorized; each of which was put into operation as soon as the funds of the institution were in amount sufficient to authorize it, and the labor of pre-

paring paper sufficient for circulation accomplished.

"As the two branches of the Bank of the United States in this State had (towards the close of the last spring) commenced making arrangements to wind up their business, some apprehensions were entertained as to the effect that the withdrawal from the State of the large amount of capital invested by that institution would have on the prosperity of the country; which application was strengthened by the fact that the heavy withdrawal of capital alluded to was about to take place at a time when the Bank of Kentucky had not attained its destined strength, and would therefore be unable to supply the capital as fast as withdrawn by the Bank of the United States. To prevent any derangement of the moneyed affairs of the country, in consequence of the withdrawal of this capital, and with a view to the immediate active employment of the capital of the Bank of Kentucky, an arrangement was made with the Bank of the United States, by which the Bank of Kentucky became the collector of so much of the debt due the branch in this city (Louisville) as the debtors would voluntarily pay, from the time of making the arrangement to the 4th of March next; the Bank of Kentucky agreeing to pay over the amount so collected, (with interest of 5 per cent. per annum,) in one, two, and three years from said 4th of March. By this arrangement, the Bank of Kentucky will have the use, for the time stipulated, of one million of dollars; thereby enabling it to extend relief to the debters to the Eank of the United States, and to give ad-

ditional aid to those branches requiring it.

"In concluding our remarks, we say with much pleasure, that whilst we are fully apprized of the very great services rendered by the Bank of Kentucky and branches (for the time they have been in operation) to every interest in society, whether commercial, agricultural, manufacturing, or mechanical, we are unapprized that there is a single debt due to the bank, or either branch, that would be considered even doubtful; and we say, with additional pleasure, that every engagement with the institution up to this

day has been met with remarkable punctuality."

10. In the report from this department of January 5, 1836, a statement is given of the condition of the (old) Bank of Kentucky, on the 31st of December, 1834, and of the Bank of the Commonwealth, on the 30th of November, 1834. No later returns of their condition have been received; nor would they, it is presumed, if they could be obtained, be considered of much moment at the present time. The time prescribed by law for closing the concerns of the (old) Bank of Kentucky expired on the 31st of December, 1835; and the report from the Bank of the Commonwealth stated that the entire amount of its notes in circulation, amounting, on the 30th November, 1834, to \$56,843, would be cancelled during the year 1835. The notes of the Bank of Kentucky in circulation on the 31st of December, 1834, amounted to only \$31,081.

NOTE.

'he sum of \$200,000, mentioned under the head of "other liabilities," he statement of the accounts of the State Bank of Illinois, has been rrowed, under the 18th section of the charter, at 6 per cent., and loaned at 10 per cent., on security of landed estate of much more than double amount."

X No. 1.—STATE OF INDIANA.

REPORT OF THE PRESIDENT OF THE STATE BANK.

To the General Assembly of the State of Indiana:

Since the last annual report of the directors of the State Bank, they proceeded, in compliance with the law in that respect, to provide for organizing the branch for the eleventh district. Fort Wayne was selected for its location; the necessary stock has been subscribed; the first instalment paid over;

and banking operations commenced there, the 25th November.

The loan of \$450,000, for the second instalment in the ten branches, and the first in the Fort Wayne branch, was negotiated by the Canal Fund Commissioners, in August last, at a premium of four and a half per cent. The instalments due from the State, amounting to \$200,000, were paid over to the several branches on the 10th November; and \$114,826 87 was loaned to individual stockholders to pay their second instalment, on their mortgaging to the State lands valued at double the amount clear of perishable improvements. The sum of \$134.951 87, due on the second instalment in the ten branches, was paid by the stockholders in specie. Such of the loan as was not borrowed by the stockholders, and the premium upon it, has been paid to the Commissioners of the Sinking Fund.

The capital paid in all the branches is now \$1,280,000, except \$221 35 of second instalment yet unpaid by individual stockholders. After paying the expenses of organizing and managing the bank and branches, and making a reservation of \$36,179 35 for the surplus fund, a dividend of three per cent. on the capital paid in was declared at the November session of the State board. The sum of \$15,000 accruing to the State has been paid over to the sinking fund; and 2,000, the tax on individual stock, set

apart as a portion of the permanent fund for common schools.

The semi-annual examinations of the branches required by the charter have been duly made, and it does not appear that a single desperate debt has been contracted to any of the branches; but as many of the debtors are yet untried, experience alone can determine how far they can be relied on for punctual payments when it becomes necessary to exact them. The officers of the branches, generally, are well qualified, and the duties confided to them, with scarce an exception, are well performed. At one of the examinations, it was attempted to ascertain what number of each employment or profession were then accommodated with loans; and it appeared that notes and bills had been discounted for 722 farmers, 339 merchants, druggists, and grocers, 272 mechanics, 134 produce and cattle dealers, 87 manufacturers, millers, and distillers, 121 persons of the different professions, 27 innkeepers, and 266 persons whose employment was unknown to the branch officers.

It was not to be expected but that differences of opinion, as to the construction of the charter, and the privileges granted by it, should arise. Such have occurred, not originating, it is believed, from wrong motives; yet, wherever these have led to questionable transactions, they have been submitted to the State board, whose proceedings have been, in general, conducted with great unanimity. The operations of the several branches present, on the whole a state of prosperity without example in institutions and a commutation

nity circumstanced like ours. Business was commenced under the most favorable auspices. The paper of the United States Bank, which had previously constituted our chief circulation, was rapidly disappearing, and, but for our bank, its place must have been supplied by the paper of local institutions, which could never have obtained general confidence. The State was free from pecuniary embarrassments, our citizens enterprising, our agricultural interest highly prosperous, and, with a large surplus produce, it only required facilities to render these sources of wealth and prosperity available. Such facilities have been afforded by the bank.

From the table annexed, it will appear that the loans of all the branches on the 21st November, were - - \$1,\$10,965-51

The paper in circulation - - - - 1,393,035 00
Specie in the vaults - - - - 797,811 97
Cash on hand, bank notes, and specie - - 1,369,845 04

The circulation obtained by the paper, and the specie on hand, are such

as have not often appeared in the operations of banking.

It will be important, both for the community and the bank, that, at as early a period as possible, its customers should be of the right class. Before its organization, much of the produce of the State was purchased by foreign capital, and but a small portion of the profits of its exportation was realized by our ewn citizens; and when the bank commenced operations, a year since the season was too far advanced to afford our exporters as much aid as was desirable. The loans, therefore, not required for active business, have, in some instances, been made for the purchase of lands from the Government or individuals. That temporary loans should be made for these purposes, cannot be objected to, especially when the funds for payment are expected to be derived from other sources than the sale of the lands. But if funds are borrowed largely from the bank to buy lands for speculation-if the farmers of the country forget that their prosperity depends upon raising good crops, and not upon an imaginary rise of the value of land-if town lots and quarter sections are to become current. like promissory notes or bank bills, it must be apparent to every person of reflection, that, though a few may realize immease fortunes before the bubbles shall burst, yet the effects must paralyze all that is good and desirable in the community. ordinary pursuits of business are neglected wherever a mania for speculation Many engage in enterprizes for which they were never calculated; the throng of competitors prevents all reflection, and a tempest succeeds, amidst which industry, economy, order, and good principles are lost. Every intelligent observer must be aware of the impossibility that general prosperity can be enjoyed except by gradually improving the condition of the different classes of the community, in their respective occupations; yet, too often such persons lend their aid to convulse society to its foundations, with the hope of rising on the ruins.

Within the past year, the increase of population in the State has been much greater than in any preceding one. Emigrants from every part of the Union have been drawn hither by the new lands thrown into market, and the large field here opening for enterprise. Canals and rail-roads are in progress and, contemplation, that promise a vast addition to the wealth of many portions of the State. While these circumstances should lead us not to undervalue our advantages, nor lose sight of the high destiny the State may attain, it should be recollected that we must depend mainly for presperity upon our agricultural resources. Commerce and manufactures will

hereafter improve, as they are needed, such positions as public convenience shall require; and these selections cannot be made, in most instances, until the direction given to the internal improvements of the State shall be more completely developed. In the mean time, however, the inclination to believe that what is most for their interest must take place, induces numbers to calculate largely upon the future growth of embryo towns that have nothing to recommend them but the wishes of their proprietors. The alternate growth and decay of western towns, the fluctuations to which they have been subject, and the wide-spread ruin frequently occasioned by speculations in their property, are well known; and though not a few may predict a different state of things hereafter, yet, as seasons of depression and difficulty must come, it will be found that the residents of towns will, in general, feel their effects much more severely than any other portion of the community.

It affords gratification to state that the business of most of the branches has been so conducted as to have no direct influence in raising the prices of real property in their immediate vicinity; and it is believed that it has not been a leading motive at any of them to effect this object; and if, for want of other customers, too many loans have been heretofore made to speculators in land and town lots, this evil will soon be corrected. Business paper, more than can be discounted, is now offered to several of the branches. and at all of them a rapid increase of business, profitable to them and useful to the country, may be perceived. If their operations be thus conducted, lands will advance in price, produce rise in value, and towns increase in size, on the basis of solid business; and the occasional depression of either will not be seriously felt, either by the bank or community. That such depreciations may take place, and at no distant period, is not improbable. Produce for some years has borne high prices, from various causes. A arge amount has been required for the accommodation of emigrants. The three last seasons have not been as productive as usual. The high prices of sotton, the great amount of capital introduced into some of the southwestern States, and the rapid improvements made there within a few years, have occasioned an unusual demand for our products. The price of cotton is depreciating; that of other property will probably follow; and if such harvest should be here gathered as have been heretofore, the prices may be, as they have been, one-third or one-fourth of their present rates. The rents, and of course the prices of land, must fall, to the injury, and perhaps the ruin, of such as are in debt and calculating to pay by the produce of the soil or an increase of its value. These fluctuations in prices may be greater than ever heretofore, if a general system of internal inprovements be commenced in the State, and nothing occur to check the extravagant calculations that under such circumstances may be indulged. The bank may exercise an important influence in these matters, by withholding its aid and encouragement from all schemes, uncertain in their result, and that are adapted more for private advantage than public good; and this will be of the more importance, from the vast field for business now opening around us, into which many will rush without any experience of the difficulties to be encountered in the west. As the resources of the State are improved, and its capabilities ascertained, there will be opportunities, in the establishment of manufactories and the greater diversity of pursuits, to insure more regularity in prices than has heretofore existed. When experience has shown what will be the demand for an article, the over production, and consequent reaction as to price, will, in a measure, cease.

In the formation of the charter for this institution, it could hardly be expected that no subsequent amendments should be necessary; yet, after the experience already had, there is very little which it is desirable to change. The machinery works well, and its construction is creditable to the authors. There are, however, some restrictions, which, perhaps, might be removed without endangering the safety of the bank or the interest of the public; and further privileges, it is believed, might be granted, by which it will be the better able to meet the new demands constantly making upon it by a rapidly improving community. In most parts of the State, there are particular seasons of the year when the demand for capital is much greater, and its employment much more beneficial, than at other times. More means for the purchase and exportation of produce are required at the river branches during the autumn and winter than they can supply; and in the interior of the State it will not be long until loans cannot be supplied to the applicants, in the spring season, who wish to purchase cattle and hogs for the fall markets.

In framing the charter, this state of things was foreseen, and was intended to be provided for in the 98th section, which authorizes one branch to loan to another, for a definite time, and issues to be made accordingly. But the time required to transfer the funds paid on New Orleans bills to the eastern cities, and the advantages which arise from keeping funds to draw upon in New York and Philadelphia, will probably prevent all arrangements

of the kind contemplated.

That banks should be allowed to contract and expand their operations to some extent, as the wants of business may require, must be a privilege of great value to the public. They can furnish money for short business transactions at a profit, by expanding their circulation, while individuals will not keep money on hand for temporary purposes. It is therefore respectfully suggested that the charter be so amended as to allow the branches, under such restrictions as shall be proper, to extend at least occasional discounts to a larger amount than twice their capital.

An enlargement of the capital at some of the branches appears to be re-

quired at this time, and will soon be needed at others.

The individual deposites in all the branches for the last half year have been as follows, at the close of each month, viz:

~							
June	-	-	-	-	-	-	\$272,987 42
July	-	- '	-	-	-	-	306,673 52
August	-	-	-	-	-	-	322,378 30
September	-	-	-	-	-	-	312,673 90
October	-	-	-	-	-	-	323,407 94
November	_	•	-	-	-	-	379,543 00

These amounts do not include the Government deposites, and are larger, in proportion to the capital, than those of any country banks in the United States, or than most of the city banks. By the 109th section of the charter, the State reserves the power of investing its education and other funds in the bank so as "to make them more productive;" and by the 21st section, the bank may "receive deposites on such terms and conditions as may be agreed upon:" yet, by the present charter, the funds of the State not subscribed as stock cannot be made productive, nor can the deposites, as they are now made, be profitable to the depositors, or an object of much consequence to the bank. But if something like a savings fund institution

could be engrafted on the branches; if they were encouraged to pay a small interest on deposites left for fixed periods; and if these could be used in the purchase of business paper, or other safe transactions, many of the wants and necessities which our increasing business requires might be supplied by means that are now without use or benefit. All experience is in favor of the happy influence of savings banks. They promote economy and regularity; they encourage to action and industry; and as the tendency of money is to flow to places of business, may not an amendment to the charter be devised, in this respect, that will add not less to the interest of the State than to the comfort and prosperity of individuals?

Annexed is a statement of the condition of the State Bank and each branch, respectively, on the third Saturday of November last, pursuant to the requi-

sitions of the charter.

Respectfully submitted, on behalf of the directors of the State Bank.

S. MERRILL.

NOTES.

The accounts of the Miami Exporting Company include those of its branch at Conneant.

This table has been formed from the statements rendered to the Locislature, with the exception of the statements of the affairs of the banks of Circleville and Norwalk, and of the Miami Exporting Company, which were made directly

to this department.

The Miami Exporting Company, and several of the other banks mentioned in the table, broke or surpended business many years, ago, and have lately been "resuscitated." No account has been received of the condition of the Alexandrian Company at Granville, one of the lately resuscitated banks.

STATEMENT of the amount of notes of different denomination owned by persons not residents of the State of Ohio; and also of the and of the amounts then paid to stockholders not resident in Ohio.

Total amount of one, two, and three dollar notes, 1,381,547 dollars.

NOTES.

This table has been formed from the reports made to the Auditor of the

State, by the different banks, near January 1st, 1836.

The Clinton Bank of Columbus has given a specific statement of the denomination of the notes of five dollars and upwards it had in circulation on the 4th of January, viz: fives, \$185,230; tens, \$27,680; twenties, \$27,720; fifties, \$59,000. The whole amount it has paid to foreign stockholders is \$4,771 93.

The amount of dividend paid to the stockholders residing in the State,

by the Life and Trust Company, was \$11,007 50.

The president of the Clinton Bank of Columbus states, that "it is believed that no bank or company owns any stock of this institution, other than that which may be temporarily hypothecated."

The Franklin Bank of Cincinnati reports that the New-York Life Insurance and Trust Company hold 249 shares, and seventy-nine individ-

NOTES.

uals not residing in the State hold 6,250 shares; of these, 1,065 shares are held by persons residing out of the United States. The *whole* amount of dividends paid to persons residing out of the State in the last year, was \$53,952.

The Bank of Geauga states, that "the annual amount of dividends paid to non-residents has not been uniform; the stock owned by foreigners hav-

ing changed more or less each year since its organization."

The Bank of Xenia had declared no dividend on the 8th December,

1836. It commerced operations on the 14th day of May, 1835.

The cashier of the Dayton Bank states, "that the Firemen's Insurance Company of Dayton have 100 shares of stock; except this, no bank or company owns stock in the bank."

The president of the Bank of Chillicothe states, "that the act incorporating the Bank of Chillicothe authorizes a capital of \$500,000, or 5,000

shares of \$100 each: 4,000 shares have been offered, sold, and paid in. Of this number, 1,719 shares are at this date owned by persons residing in the States of Virginia, Pennsylvania, Kentucky, Delaware, Connecticut, Maryland, Indiana, and the District of Columbia. It is difficult to ascertain the amount of dividends paid to the stockholders residing out of the State, inasmuch as there are frequent transfers from resident to non-resident stockholders, and vice versa, and the dividend is sometimes divided between the buyer and seller, in some proportion agreed on. A dividend of five dollars a share was paid in July, and would amount to \$8,595 on the number of shares mentioned; the dividend for the half year just closed has not yet been paid. The number of shares held by non-resident stockholders on the 1st of January, 1835, was 1,114; at which time five dollars a share was also The difficulty of ascertaining the exact amount paid to non-restdents will be obvious from these facts: but it is presumed the information asked by the General Assembly can be obtained with sufficient precision by means of the data new furnished."

The cashier of the Bank of Norwalk says, 622 shares are owned by individuals living out of the State; on which has been paid \$47,078 09.

The number of companies and individuals residing out of the State, who hold stock in the Lafayette Bank of Cincinnati, is forty-nine; owning,

together, 5,778 shares.

None of the stock of the Commercial Bank of Lake Erie is owned by any incorporated company. There are 4,091 shares held by persons not resident within the State, as near as can be known to its officers, on which dividends were paid during the past year of \$22,500; the greatest proportion of which has been expended within the State.

Individuals in the States of Pennsylvania and Virginia, and in the city of London, ewn stock in the Mount Pleasant Bank to the amount of \$14,200. The dividend paid to them last year was \$1,254. No other

stock held by any bank or company out of the State.

Western Reserve Bank.—No person out of the State holds any stock in this bank, except one who resides within twenty miles of the bank. He holds fifty shares.

Columbiana Bank of New Lisbon.—The amount of stock owned out of the State is \$6,000 held by individuals. The amount of dividends paid to

foreign stockholders annually, cannot now be stated.

Farmers' Bank of Canton.—"Stock originally owned by citizens of this State entirely; \$5,400 are now owned by 'non-residents,' who were citizens of the village when the bank resuscitated, whose annual dividends are

at the rate of six per cent."

The Legislature of Ohio entered into a negotiation with the different banks in the State, to ascertain how many of them would be "willing to surrender so much of their charter as authorizes the issuing of bills of a less denomination than five dollars." To this proposition, the following answers were received:

Bank of Cleaveland.—With respect to surrendering any part of the privileges conferred by their charter, the president states, "they have no power to act, and that the stockholders cannot be consulted as early as the 20th

mstant.

Clinton Bank of Columbus.—In respect to surrendering a portion of their charter, the cashier has been instructed to reply, and says "that the directors have no authority to surrender any power conferred by their charter,

without the consent of the stockholders. They believe that the measure contemplated in the resolution is called for by the public interest, and should be promptly carried out by all the banks in the State: and they do not doubt that the stockholders, whom they represent, would concur in this opinion, and consent to the adoption of the measure.

"It is obvious, however, that if the surrender should not be made byhe banks generally, it would be hard in its operations on those taking the lead: and in that event, it is supposed the Legislature would not expect or desire them to come into the measure without extending to them some

equivalent."

Franklin Bank of Cincinnati.—The directors are willing to surrender so much of their charter as authorizes issuing bills of a less denomination

than five dollars, presuming that the stockholders will be satisfied.

Bank of Sandusky.—In reference to surrendering so much of their charter as authorizes the issuing of notes of a less denomination than five dollars, the cashier states "that it will be necessary to call a meeting of the stockholders to determine the question; and that, from consulting the stockholders here, it is thought doubtful, in smuch as it is believed that it will be adverse to the interest of the institution and to the public convenience."

Ohio Life Insurance & Trust Company.—The company issue no notes

of a less denomination than five dollars.

Bank of Marietta.—The directors of this bank are of opinion that it is not legally competent for them to surrender any of the chartered rights of the bank, which appertain to, and are vested in, the stockholders; and that, therefore, it is unnecessary to go into the expediency of the proposition made by the resolution.

Bank of Muskingum.—The cashier states "that the directors of this institution do not feel authorized to surrender any part of its charter, with-

out the concurrence of the stockholders generally."

Bank of Geauga.—The "stockholders," after deliberation, "consider the alteration in their charter, as suggested, would materially affect the commercial and agricultural interests of our country, to the injury of both; and would, therefore, respectfully decline surrendering the rights referred to.

Bank of Zanesville.—The board of directors are unanimously of opinion that the power of surrendering any of the provisions of the charter is not vested in them as directors; and that as the power, in their opinion, is vested only in the stockholders, the question will be submitted for their de-

cision at the next annual meeting.

Dayton Bank.—" Resolved, That the board of directors of this bank are willing, so far as they have power, to surrender to the Legislature so much of their charter as authorizes them to issue notes of a less denomination than five dollars."

Bank of Wooster.—The directors of this bank have decided, with but one dissenting vote, that they are unwilling to relinquish any part of their

charter, not considering they have any power to do so.

Bank of Chillicothe.—Respecting the suspension of bills less than five dollars, the stockholders of this bank "Resolved, That the cashier of the Bank of Chillicothe be instructed to answer the letter of the Auditor of the State of the 31st ultimo, informing him that the stockholders are willing to surrender so much of their charter as authorizes the issuing of bills of a less denomination than five dollars, provided all the banks of the State will do the same, and that banks hereafter chartered shall be restrained from issuing notes less than five dollars."

Bank of Norwalk.—Respecting a suspension of bills less in denomination than five dollars, the cashier states, that "The following facts are within the knowledge of the officers of this institution: That notwithstanding the law of this State prohibiting the circulation of small notes of foreign banks, they continue to compose a considerable portion of our currency: that loans of such notes have been made by eastern banks for use here: that the attempts in the eastern States to repress them have not been successful: that loans of large amounts of small notes have been made by banks in Ohio, to be used in eastern States, where their circulation is prohibited; and that such notes have obtained an extensive circulation, from the presumed necessity of such a currency to supply the ordinary demands of business."

I am, therefore, instructed to reply, that the Bank of Norwalk would not withhold its assent or co operation to a measure by which the circulation of small notes would be effectually prevented; but under the belief that a law of this State alone, restraining such issues from the domestic banks, would not suppress the circulation of such notes when their use was not likewise interdicted in all the neighboring States, Territories, and Prov-

inces, it declines for the present to waive its privileges.

Farmers and Mechanics' Bank of Steubenville .- On receiving the proposition for surrendering that part of the charter of this institution authorizing the issuing of bills less in denomination than five dollars, the president laid it before the board of directors, who referred the subject to the consideration of a committee. This committee reported in seven resolutions. The 1st declares the opinion that the directors have no authority to surrender any part of their corporate rights, without the consent of the stockholders. The 2d expresses the opinion that the banks in Ohio have been too liberal in their issues of small notes. The 3d avows their conviction that the circulation of such a proportion of notes less than five dollars is highly convenient to the public. The 4th, that as a remedy for excessive issues, the banks in this State should assent to a modification of their charters. The 5th gives it as their opinion, that such a restriction as that mentioned in the foregoing resolution would meet with no serious opposition from the stockholders. The 6th declares that the highest considerations of public policy require that such a suspension be not hastily or suddenly brought about. The 7th directs the cashier to forward said resolutions to the Auditor of the State.

Bank of Scioto.—" At a special meeting of the directors, they instructed the cashier to express their unwillingness to surrender that part of their charter which authorizes the issuing of notes of a less denomination than five dollars."

Bank of Circleville. The President says, "At a meeting of the stock-holders of the Circleville Bank, they expressed a willingness to enter into any arrangement in relation to surrendering that part of their charter authorizing the issuing of small notes, which should be assented to by the other banks in the State generally: expecting, in consideration of the expense which they have so recently incurred for plates, paper, &c., for small notes, that the Legislature would be willing, upon a surrender of the privilege, to grant them some equivalent. But deeming it proper that the stockholders, who reside at a distance, and who have a strong interest in the institution, should be consulted upon so important a question, I am not authorized to reply more fully until they can be heard from."

Commercial Bank of Lake Erie.— "The question" of surrendering so much of their charter as authorizes the issuing of notes less than five dollars, "is one in which the directors have no power to act, it being a proposition to yield a part of the franchise conferred by their charter; and that the stockholders cannot be consulted in season to enable you to lay the result before the Legislature at its present session."

Belmont Bank of St. Clairsville.—It is deemed inexpedient by the bank to surrender so much of their charter as authorizes the issuing of

bills of a less denomination than five dollars.

Bank of Mount Pleasant.—If the majority of the banks in the State surrender so much of their charters as authorizes the issuing bills of a less denomination than five dollars, the directors of this institution are willing to do so likewise.

Western Reserve Bank.—"The directors of this bank consider that they have no authority to relinquish any right which the stockholders have under the charter, and they consider it doubtful whether the stockholders can do it in a general meeting, without the unanimous consent of all; which would be difficult to obtain, even if all were present, as some are minors."

Franklin Bank of Columbus.—Without an authority from the steckholders, the directors of this bank believe that they have not the power to surrender any of the franchises of the corporation. A meeting for this purpose, it was supposed, could not be convened in time to meet the contemplated action of the Legislature. The directors, however, would very cheerfully yield their minor rights to what the guardians of the public might deem for the general interest of the community. They would, however, be apprehensive that a sudden withdrawal of notes of a less denomination than five dollars would produce not only inconvenience, but much public distress. To supply their place in the circulation would, necessarily, require one-fourth of the specie now in the banks, and a curtailment of discounts must follow in the prudent exercise of banking, to The consequence must be a very general derangedouble that amount. ment of the business of the State. It is also apprehended, that reluctance will be felt to pay large proportions of specie in exchange for the notes of distant banks, and that, consequently, a permicious system of artificial brokerage will be generated. Were it not for considerations of this kind, it is presumed those interested in this bank would have no objection to relinquish the right, provided others should come into the measure."

Farmers Bank of Canton.—"This bank is willing to surrender that part of their charter authorizing the issning of notes less in denomination than five dollars, only on condition that all other banks of the State do so."

Commercial Bank of Cincinnati.—This bank will cease issuing notes

of a less denomination than five dollars on the 4th of March, 1836.

Urbana Bark.—In answer to the inquiry addressed to this bank, whether it is willing to surrender the right to issue small notes under the denomination of five dollars, I am directed by the board of directors to say, that, except for the special purpose of electing directors, a legal meeting of the stockholders in this company cannot be convened, except by six weeks' public notice, specifying the objects and the matters to be considered at the meeting. The board of directors do not suppose they have power, under the charter, to surrender any of the corporate privileges of the company, without the assent of the stockholders. As such a meeting could not

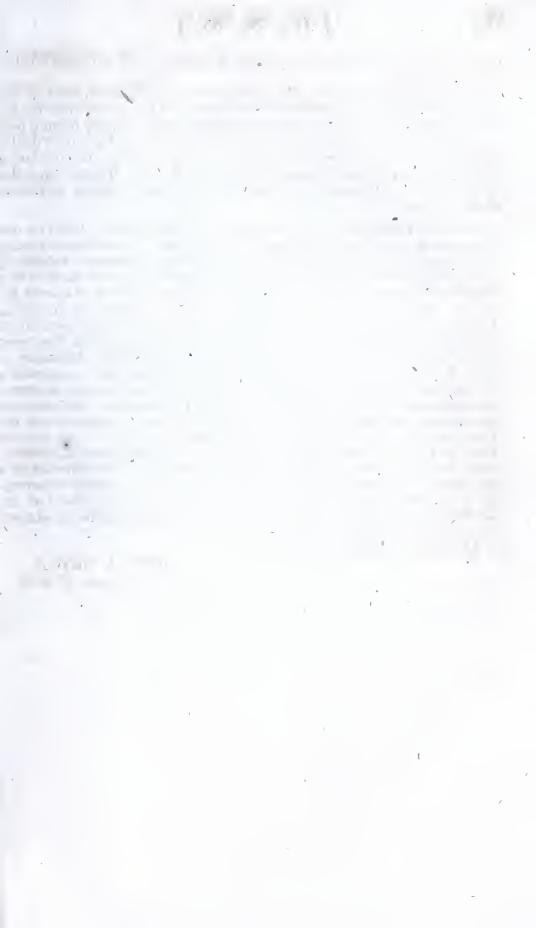

be convened in time to give any answer to the resolution, no steps willbe taken to call one.

Lancaster (Ohio) Bank.—The directors of this institution have no authority to surrender any portion of the charter. That power rests exclusively with the stockholders. But should the banks generally deem it best to accede to the wishes of the Legislature, this bank, we have little doubt, would go into the measure of restraining, as far as possible, the circulation of bank notes of a less denomination than five dollars. Yet we think the change would prove highly prejudicial to the ordinary business operations of the country.

The period assigned by the Legislature (the 20th January, 1836) by the expiration of which the information required was to be obtained, having fully expired, I have the honor herewith to submit a statement, exhibiting as full a report from the several banks as the communications made to this office would permit, under the two resolutions passed by the General Assembly. There are several, viz; the banks of Xenia, Massillon, Hamilton, Lafavette, Cincinnati, and New Lisbon, which have as yet sent in no answer to the resolution of the Legislature, inquiring whether they were willing to surrender so much of their charters as authorizes the issuing of bills of a less denomination than five-dollars. Three have expressed a willingness to comply unconditionally with the resolution asking a surrender of [so much of] their charters authorizing the issuing of bills less than five dollars, and five that have absolutely declined. The former are the Franklin Bank of Cincinnati, the Commercial Bank of Cincinnati, and the Bank of Dayton. The latter are the Banks of Geauga, Norwalk, Steubenville, Marietta, Scioto, and the Bank of St. Clairsville. The directors of a number of the other banks say that they have not the power to surrender any of the franchises of their institutions, without the consent of the stockholders generally, which could not be obtained during the present session of the Legislature.

All which is respectfully submitted.

JOHN A. BRYAN, Auditor of State.

NOTES.

The Michigan State Bank returns \$16,861 under the head of "specied deposites." This is ambiguous. In a return of the state of that bank on the 26th of October, 1835, (as may be seen by reference to the report from this department, dated January 5, 1836) it was stated to have \$14,102 in specie, and to owe \$9,465 to depositors. The whole amount now returned by it, as specied eposites, has, in the above table, been placed in the "specie" column in the above table, but perhaps incorrectly.

The Bank of Michigan has a branch at Bronson, the Farmers and Mechanics' Bank a branch at St. Joseph, and the Bank of the River Raisin a branch at Pontiac. The branch of the Michigan Bank was estab-

lished May 7, 1834.

The statement of the affairs of the Bank of Washtenaw has been taken from the Treasury report of January 5, 1836, no later returns from that bank having been received at the department.

"Aggregate of estimates and returns of Stable and a aperation. In addition to these, eleven have been chartered, and have not yet commenced business

Notes to the summary statement A A.

To complete the statements in the first division of this table, it has been found necessary to make a computation of the specie, circulation, and other resources and liabilities of four small banks in New Jersey, of two in South Carolina, of one in Florida, and of one in Louisiana. Returns have been received of the amount of capital of these banks, and it has been computed that their various resources and liabilities are in about the same proportion to their capital as the resources and liabilities of the other banks in those States are, respectively, to the amount of capital paid in.

It has further been found necessary, in order to complete the statement, to take from the Treasury report of January 5, 1836, the accounts of the condition of one small bank in Vermont, of one in Connecticut, and of one

in Michigan. These cannot materially affect the general result.

The statement is, however, still defective, as it has been found impossible to obtain an account of even the amount of capital paid in of several banks in Mississippi, of the Southern Life and Trust Company, and of the

Alexandrian Company, at Granville, Ohio.

As the Treasury Department is entirely dependant on the courtesy of the officers of the different State Governments, and that of the officers of the different State banks, for the materials from which it prepares such reports as those, the same fullness and precision cannot be expected as is found in those statistical tables which are prepared from materials furnished by officers of the United States Government, and which have more or less relation to their immediate functions. The various modes in which the banks in the different States keep their accounts, and the irregularity with which returns are received at the Department, increase the difficulty not a little.

In addition to the returns given in the tables from A to Z, and included in the summary A A, accounts have very lately been received of the condition of one bank in Massachusetts, of one in Pennsylvania, and of one in Mississippi. All these banks were in operation on the 1st of January, 1836; but as the accounts of their condition belong rather to the epoch of 1836-'37, than to that of 1835-'36, it has not been thought advisable to recast the foregoing tables for the sake of introducing them into the summary.

Adding them to the banks included in the summary AA, and adding also the Farmers and Planters' Bank, given in the appendix to the table of banks in Maryland, and supposing the computation given of the condition of the branches of the Louisiana banks to be correct, (see the notes to S No. 1,) the general statement of the condition of the banks will be as fol-

Wisconsin -	-	-	-	-	1	100,000
Total	140	-	() -	•′	, 110	\$95,170,000

NOTE.

This is the gross amount of the capitals of banks lately chartered by the State Governments, so far as returns have been received at the Treasury Department. But inasmuch as the Bank of the United States was in operation, up to March 4, 1836, under a charter granted by Congress, the nett increase through the granting of new charters is only \$60,170,000. Add to this the power given to thirty-four old banks to increase their capitals in the aggregate amount of \$12,195,000, and the whole increase will appear to be \$72,365,000.

/D.D.

RATIO of circulation to specie, according to the returns contained in the Treasury report of January 5th, 1836, and those given in the present report.

NOTES.

The banks in Maine, New Hampshire, Vermont, and Connecticut, depend, for the redemption of their notes, less on the amount of specie they have in their vaults, than on credits established by them with the banks of Boston and New York. This will serve to explain the great disparity between the amount of their circulation and specie on hand.

In like manner, the banks of some of the southwestern States (especially

[·] Specie funds.

^{*} Specie and specie funds.

those of Tennessee) depend, for the redemption of their notes, on credits established with the banks of New Orleans, New York, and Philadelphia.

The following statement gives the aggregate amount of notes circulated in England and Wales, by the Bank of England, by private banks, and by joint-stock banks and their branches, at the dates annexed:

Notes to the comparative view of the condition of all the banks in the United States, in 1833,-'34, 1834-'35, and 1835-'36.' (F.F.)

In preparing this synopsis, the "abstracts, &c. of the condition of the banks" for 1833 and 1834, "compiled under the direction of the Clerk of the House of Representatives from materials collected by Mr. Wilde," have been corrected, as far as time and means would allow. In that compilation, as appears from returns subsequently received, the capital of the banks of one State was underrated in the amount of about two millions, and the capitals of the banks of some other States were overrated in the amount of about eight millions, which led to corresponding errors in the estimates of the various resources and liabilities of the banks.

For the column headed "1834-'35," the summary statement C C, in the Treasury report of January 6, 1836, has been used; and for the

column "1835-36," the summary A A of the present report.

The item "specie funds" is so indefinite, that but little use eould be made of it in collating the accounts of the banks. Sometimes, in the statements of the banks, it means "specie and notes of other banks;" sometimes, it means "specie and notes of other banks, and deposites in other banks;" sometimes it includes, besides, certain species of bills of exchange, and sometimes other evidences of debts due to the banks. All these, when returned under the denomination of "specie funds" have been used in summing up the "immediate means" of the bank, though more definite returns would probably show that a portion of these "specie funds" constitute no part of their immediate means.

The apparent surplus of the banks is that which will remain to them,

supposing all the debts due to them to be paid.

The total of the "liabilities of the banks to one another" is made up of the items "due from other banks," "notes of other banks on hand," and "due to other banks."

The nett circulation of the banks has been ascertained by deducting from the gross circulation the amount of "notes of other banks on hand."

An attempt has been made to ascertain the nett fund the banks have for discounting upon, by deducting from the capital paid in the amount returned as held in stocks and real estate, and included under the head of "other investments;" and by then adding to the sum thus found the apparent surplus the banks have, after paying all demands, including those to their own stockholders. If the nett fund of the banks could be correctly stated, it would point out the exact amount to which the banks make loans and discounts on the basis of deposites and circulation. But, owing to the way in which the banks give statements of the eondition of some of their branches, it is impossible to arrive at a satisfactory conclusion on this point. A part of the sum included under the general head of "other investments," in reality forms a capital for the branches; and these branches appear to have made loans and discounts to an extent which must be left to computation.

The value of tables of this kind would be greatly increased, if the banks all made their returns on the same day of the year. But this is an object which can be attained only through the general co-operation of the States

Governments.

Notes to Table G. G.

This table is given, not as absolutely correct, but as serving to show the period when the banking system was introduced into the different States, and when and where it has been most extended.

The columns from 1792 to 1805, inclusive, have been filled up from va-

rious documents.

Those from 1811 to 1830 have been filled up from the statements appended

to Mr. Gallatin's "Remarks on the Currency and Banking System."

The column for 1834 has been filled up by collating the various statements given in the "abstracts, returns, and estimates of the condition of the several State banks, compiled under the direction of the Clerk of the House of Representatives, from materials collected by Mr. Wilde," read June 24, 1834.

Returns since received at the Treasury Department have, as already mentioned in the notes to F F, shown that some of the estimates for 1834 were erroneous. In the "comparative vicw," they have been corrected as far as times and means would allow. Here the number of banks, and the amount of capital for 1834, are inserted as published last year, to call attention to the subject, and as open to further correction.

All the columns are, indeed, open to correction; but it is thought a batter purpose may be answered, by publishing them in the present form, and calling attention to the subject, than by attempting to correct them by means of

the imperfect materials at present in possession of the Treasury Department. They are, as mentioned in the commencement of these notes, believed to be

sufficiently accurate for the general purpose intended.

The authorities on which statistical writers appear to have placed their chief dependance in their attempts to show the number of banks in operation previous to the late war with Great Britain, are Blodget's Economica, and the American edition of the Edinburgh Cyclopædia. To show the want of further information on this subject, the tables in these two works have been recast, and are hereunto appended.
